## INTRODUCTION

Ramathibodi Cancer Registry 2021 is the result of the fruitful collaboration between units and departments of the Faculty of Medicine, Ramathibodi Hospital, Mahidol University.

I would like to thank all of our collaborators for their help in providing data presented in this volume of Cancer Registry.

Ramathibodi Cancer Registry provides the hospital-based cancer data of new cancer cases each year. This data provides important base information in the field of research and policy making.

I hope that the data from this Ramathibodi Cancer Registry will benefit health personals, physicians, medical students, researchers, patients, relatives and eventually general population.

**Associate Professor Surasak Leelaudomlipi**

Director of Ramathibodi Hospital

Faculty of medicine, Ramathibodi Hospital

## ACKNOWLEDGEMENTS

**We would like to express our gratitude to:**

The dean of Faculty of Medicine Ramathibodi Hospital, Professor Piyamitr Sritara, for his support and providing resources for this Cancer Registry.

The director of Ramathibodi Hospital, Associate Professor Surasak Leelaudomlapi for all his support and advise.

The former chairman of Ramathibodi Comprehensive Cancer Center Committee; Associate Professor Ekaphop Sirachainan for all his support and advise in preparing this report.

The Ramathibodi Comprehensive Cancer Center Committee members and Cancer Registry Committee members for their hard work in contribution to the preparation of the Cancer Registry manuscript.

Cancer Registry staffs of the Faculty of Medicine, Ramathibodi Hospital for their continuous support in the data collection.

Finally, we would like to give a special thanks to the cancer registry coordinator and her team who have pushed their maximum efforts in contribution to the good quality cancer data.

**Professor Sarikapan Wilailak**

Chairman, Cancer Registry Committee

# CHAPTER I

## REGISTRY PROCEDURE AND STATISTICAL METHODS

### 1.1 Purpose of the registry

The Ramathibodi Cancer Registry (RCR) is a hospital-based cancer registry. The epidemiology including incidence and survival data of all cancer patients who are diagnosed and/or treated for cancer in the Ramathibodi hospital are collocated. The goods of the RCR are to:

- determine the incidence of cancer in Ramathibodi hospital with demographic and social characteristics.
- evaluate the outcome including the survival and prognostic factors affecting the survival and mortality.
- provide data in planning effectively plan services, measure prevention and intervention strategies.
- provide a database and serve as a resource in conducting epidemiologic studies.
- provide data to assist public health officers and hospital administrators in planning health policy.

### 1.2 Data collection

Each department in Ramathibodi hospital including surgical out patient, radiation outpatient and pathology laboratory is responsible to complete all data on cancer diagnosed and treated within six months of diagnosis. Sources for identifying eligible cases include:

- all types of malignancies including skin cancer, pre-invasive cancer or carcinoma in situ, neoplasm with malignant potential
- all types of myeloproliferative disorders
- all types of malignant histiocytosis
- carcinomatosisperitonei without detectable primary
- thymoma-both benign and malignant
- all type of CNS tumors (intracranial & spinal cord) both benign and malignant
- gastrointestinal stomach tumor

#### Exclusion criteria

1. Pre-malignant

Remarks: When a cancer case is reported from more than one department, the information is consolidated into one record

#### **Reported cases contain the following data:**

- Patient characteristics (including demographic data at the time of cancer diagnosis)
- Descriptive data of cancer (including date of diagnosis, primary site\*, histology, metastatic sites, extent of disease, staging etc.)

\* Primary site, behavior, grade, and histology were coded

### **1.3 Statistical Methods**

#### **Morphologically verified cases (%MV):**

The percentage of cases whose diagnosis were based on cytology or histology examination of tissue from primary site or metastasis site, peripheral blood and bone marrow aspiration, including autopsy specimens.

#### **Childhood cancer:**

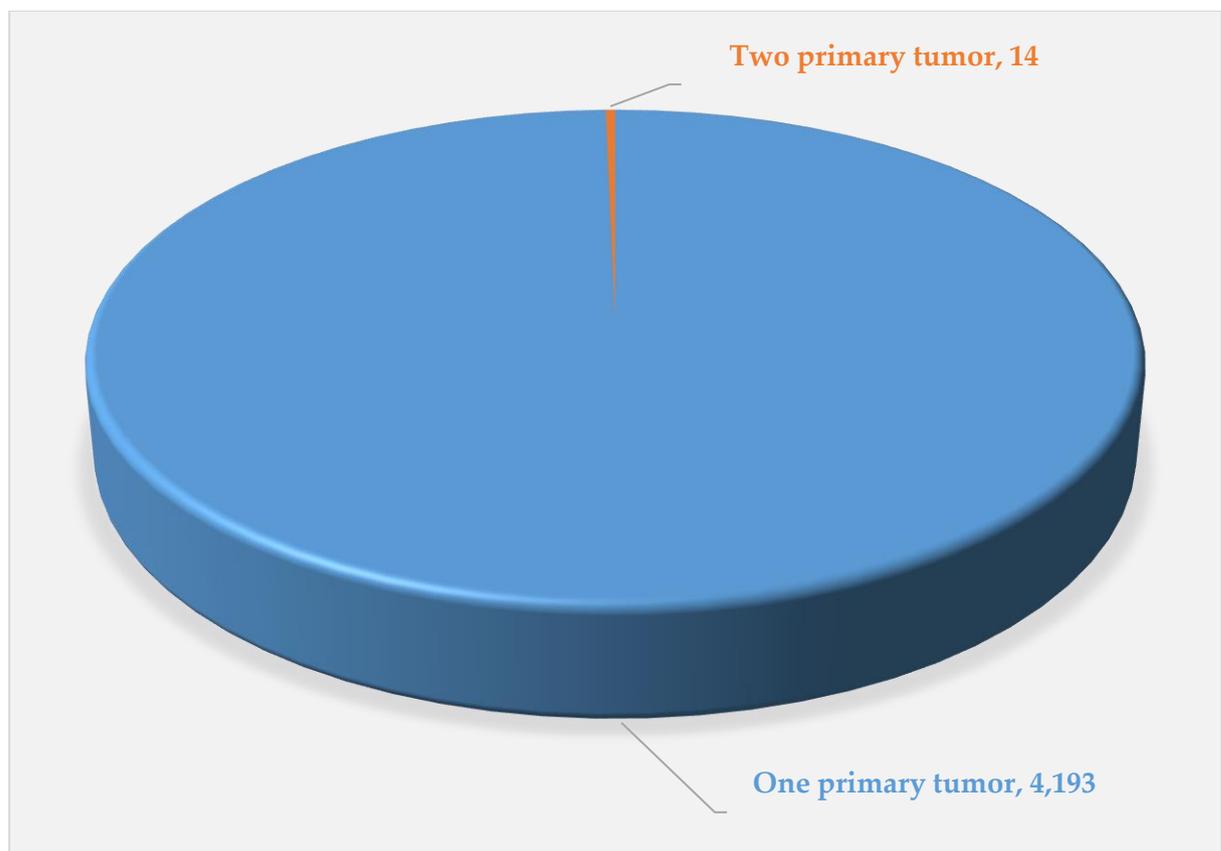

The results for cancer in the childhood are presented according to the diagnostic groups defined in "International Classification of Childhood Cancer 1996" this was done by simply adding together the cases in age between 0-14 years old
