General characteristic of study
Study design
[1] RCT [2] Quasi-experimental design
Follow-up timemonths
Intervention
[1] **Mycophenolate mofetil dose/day**

[2] Azathioprine **dose/day**
[3] **Cyclophosphamide dose/day**

Follow-up duration
Type of Participants
[1] Children
[2] Adult
Type of Outcomes & definitions
[1] Complete remission measured by
[2] Partial remission measured by
[3] Infection
[4] Leucopenia
[5] Ovarian failure

Table1. General characteristic of subjects

Characteristics	Intervention I	Intervention II	Overall
