

CONTRIBUTING AUTHORS TO THE THIRD EDITION

CONTENTS

<i>Contributing Authors to the Third Edition</i>	vii
<i>Contributing Authors to the Second Edition</i>	ix
<i>Contributing Authors to the First Edition</i>	xi
<i>Preface</i>	xiii

PART 1 Fundamentals of Neuropharmacology

1. Basic Principles of Neuropharmacology	3
2. Cellular Basis of Communication	18
3. Synaptic Transmission	57
4. Signal Transduction in the Brain	76

PART 2 Neural Substrates of Drug Action

5. Excitatory and Inhibitory Amino Acids	121
6. Widely Projecting Systems: Monoamines, Acetylcholine, and Orexin	149
7. Neuropeptides	184
8. Atypical Neurotransmitters	201

PART 3 Neuropharmacology of Neural Systems and Disorders

9. Autonomic Nervous System	227
10. Neural and Neuroendocrine Control of the Internal Milieu	245
11. Pain	268
12. Neuroinflammation	289
13. Sleep and Arousal	303
14. Higher Cognitive Function and Behavioral Control	326
15. Mood and Emotion	349
16. Reinforcement and Addictive Disorders	377
17. Schizophrenia and Bipolar Disorder	403
18. Neurodegeneration	427
19. Seizure Disorders	463
20. Stroke and Migraine	480

<i>Index</i>	499
