Cellular receptors of innate immunity: distinguish 'non-self' from 'self'	47
Tissue macrophages carry a battery of phagocytic and signaling receptors	49
Recognition of LPS by TLR4 induces changes in macrophage gene expression	51
Activation of resident macrophages induces a state of inflammation at sites of infection	53
NOD-like receptors recognize bacterial degradation products in the cytoplasm	54
Inflammasomes amplify the innate immune response by increasing the production of IL-1 $\beta$	55
<b>Chapter 1</b> Elements of the Immune System and their Roles in Defense	1
<b>Chapter 2</b> Innate Immunity: the Immediate Response to Infection	29
<b>Chapter 3</b> Innate Immunity: the Induced Response to Infection	47
<b>Chapter 4</b> Antibody Structure and the Generation of B-Cell Diversity	81
<b>Chapter 5</b> Antigen Recognition by T Lymphocytes	113
<b>Chapter 6</b> The Development of B Lymphocytes	149
<b>Chapter 7</b> The Development of T Lymphocytes	177
<b>Chapter 8</b> T Cell-Mediated Immunity	199
<b>Chapter 9</b> Immunity Mediated by B Cells and Antibodies	231
<b>Chapter 10</b> Preventing Infection at Mucosal Surfaces	267
<b>Chapter 11</b> Immunological Memory and Vaccination	295
<b>Chapter 12</b> Coevolution of Innate and Adaptive Immunity	329
<b>Chapter 13</b> Failures of the Body's Defenses	365
<b>Chapter 14</b> IgE-Mediated Immunity and Allergy	401
<b>Chapter 15</b> Transplantation of Tissues and Organs	433
<b>Chapter 16</b> Disruption of Healthy Tissue by the Adaptive Immune Response	473
<b>Chapter 17</b> Cancer and Its Interactions with the Immune System	509
