Preface	ix	<i>Hold: implant choice</i>	85
Dedications and acknowledgements	x	<i>Move: activity restriction and weight-bearing</i>	101
Contributors	xi		
Part 1: General Principles	1	6 Musculoskeletal infection and joint aspiration	103
1 Fractures and fracture management	2	<i>Acute arthritis</i>	103
<i>Orthopaedic terminology</i>	2	<i>Cellulitis</i>	105
<i>Assessment of a fracture</i>	12	<i>Necrotizing fasciitis</i>	105
<i>Principles of fracture management</i>	15	<i>Abscesses</i>	106
<i>Bone structure and healing</i>	16	<i>Muscle infection</i>	107
<i>How to present a radiograph</i>	18	<i>Bone infection (osteomyelitis)</i>	107
2 Management of the injured patient	21	<i>Joint aspiration and injection</i>	109
<i>Major trauma</i>	21	7 Complications	115
<i>Intravascular fluid replacement in major trauma</i>	25	<i>Non-union</i>	115
<i>Decision-making in trauma</i>	26	<i>Infection</i>	117
<i>Anaesthesia and analgesia</i>	30	<i>Malunion</i>	117
<i>Trauma in the elderly</i>	35	<i>Bone defects</i>	118
3 Limb-threatening injuries	40	<i>Heterotopic ossification</i>	119
<i>Closed soft tissue injuries</i>	40	<i>Complex regional pain syndrome</i>	120
<i>Open fractures</i>	41	<i>Pathological fractures</i>	122
<i>Compartment syndrome</i>	45	Part 2 Specific Injuries by Region	127
<i>Crush injuries</i>	49	8 Shoulder girdle	128
<i>Nerve injury</i>	50	<i>General principles</i>	128
<i>Vascular injury</i>	58	<i>Clavicle</i>	134
<i>The mangled limb</i>	60	<i>Acromioclavicular joint</i>	139
<i>Signpost injuries</i>	61	<i>Sternoclavicular joint</i>	142
4 Closed management of fractures	62	<i>Scapula</i>	144
<i>Reduce: closed reduction</i>	62	<i>Scapulothoracic dissociation</i>	145
<i>Hold: principles of cast management</i>	64	<i>Anterior shoulder (glenohumeral) dislocation</i>	146
<i>Backslabs</i>	65	<i>Posterior shoulder dislocation</i>	152
<i>Full casts</i>	73	<i>Inferior shoulder dislocation (luxatio erecta)</i>	155
<i>Limb elevation</i>	76	<i>Rotator cuff tears</i>	156
<i>Cast aftercare</i>	78	<i>Calcific tendonitis</i>	157
<i>Orthoses</i>	81	<i>Frozen shoulder (adhesive capsulitis)</i>	158
5 Operative management of fractures	83	9 Humerus	159
<i>Reduce: closed or open fracture reduction</i>	83	<i>General principles</i>	159
<i>Hold: construct stability</i>	83	<i>Proximal humeral fractures</i>	164
		<i>Humeral shaft fractures</i>	173

Long head of biceps rupture (proximal injury at the shoulder)	179	Distal phalanx: rigger jersey finger	279
Biceps tendon avulsion (distal injury at the elbow)	180	Distal phalanx: closed tuft fractures	280
10 Elbow	181	Dislocations	280
General principles	181	Carpometacarpal joint dislocations	280
Distal humeral fractures	184	Thumb metacarpophalangeal joint instability: ulnar collateral ligament rupture or 'gamekeeper's thumb'	280
Radial head and neck fractures	194	Metacarpophalangeal joint dislocations	281
Olecranon fractures	199	Proximal interphalangeal joint dislocations	282
Elbow dislocation	204	Distal interphalangeal joint dislocations	283
11 Forearm	212	Soft tissue injuries of the hand	284
General principles	212	Extensor tendon injury	284
Radial shaft fractures	215	Flexor tendon injury	284
Ulnar shaft fractures	218	Fingertip injuries	285
Both-bones fracture of the forearm	224	Trigger finger	287
Compartment syndrome of the forearm	226	Hand infections	287
12 Wrist and carpus	227	Fingertip infections	287
General principles	227	Flexor sheath infection	288
Distal radial fractures	234	Septic arthritis	289
Distal ulnar fractures	248	14 Spine	290
Scaphoid fractures	248	General principles	290
Other carpal fractures	253	Principles of management of major spinal trauma	294
Carpal instability	254	Major spinal injuries	304
Carpal tunnel syndrome	259	Atlanto-occipital injuries	304
Differential diagnoses for acute wrist pain	261	Atlanto-axial fractures and instability	305
13 Hand	263	Subaxial cervical fractures C3-C7	307
General principles	263	Fractures of the thoracic and lumbar (thoracolumbar) spine	309
Immobilization of hand injuries	268	Sacral fractures	316
Metacarpal fractures	271	Spinal cord injuries	316
Metacarpal head		Minor spinal injuries	317
Fractures	271	Spinous process fractures	317
Metacarpal neck fractures	272	Coccyx fractures	318
Metacarpal shaft fractures	272	Other spinal pathology	318
Finger metacarpal base		The ambulant patient with back pain	318
Fractures	275	The ambulant patient with neck pain	321
Thumb metacarpal base		Lumbar radiculopathy	321
Fractures	275	Cauda equina syndrome	323
Phalangeal fractures	277	Spinal infection	324
Proximal and Intermediate		Spondylolisthesis	324
Phalanges: extra-articular			
Fractures	277		
Proximal and intermediate			
Phalanges: intra-articular			
fractures	278		
Distal phalanx: mallet finger injury	279		

15 Pelvis	326	Midfoot fractures	540
General principles	326	Tarsometatarsal (Lisfranc) injuries	542
Pelvic ring injuries	329	Metatarsal fractures	546
16 Acetabulum	341	Metatarsophalangeal joint and toe injuries	548
General principles	341	Compartment syndrome of the foot	549
Acetabular fractures	342	Foot sprains	551
17 Hip	350	23 Principles of paediatric trauma	553
General principles	350	Trauma in the skeletally immature	553
Hip fractures	352	The unique properties of children's bones	553
Hip dislocation	375	Physcal injuries	553
Femoral head (Pipkin) fractures	378	Types of paediatric fracture	558
Periprosthetic fractures around the hip	379	Interpreting paediatric radiographs	561
Atypical hip fractures	383	Neurovascular complications	561
18 Femur	385	Non-accidental injury	562
General principles	385	The limping child	563
Femoral shaft fractures	388	24 Upper limb paediatric trauma	566
Distal femoral (supracondylar) fractures	410	Shoulder girdle	566
19 Knee	418	Clavicle	566
General principles	418	Scapula	566
Knee dislocation	427	Proximal humeral fractures	566
Isolated knee ligament injuries	430	Glenohumeral dislocation	567
Tibial spine fractures	432	Humeral cysts	568
Meniscal injuries	432	Humeral shaft fractures	568
Quadriceps and patellar tendon ruptures	434	Elbow	568
Patellar fractures	437	Supracondylar fractures of the humerus	569
Patellar dislocation	441	Lateral condylar fractures	575
Non-specific soft tissue knee injury	442	Medial condylar fractures	577
20 Tibia	444	Medial epicondylar fractures	577
General principles	444	Elbow dislocation	578
Tibial plateau fractures	445	Olecranon fractures	578
Tibial shaft fractures	456	Radial head and neck fractures	578
21 Ankle	472	Forearm	579
General principles	472	Monteggia fracture dislocation	579
Ankle fractures	479	Galeazzi fracture dislocation	579
Pilon fractures	506	Diaphyseal fractures of radius and ulna	580
Ankle sprains	514	Wrist	584
Achilles tendon rupture	514	Fractures of the distal radius and ulna	584
Peroneal tendon dislocation	515	Hand and carpus	586
22 Foot	518	Carpus	586
General principles	518	Scaphoid	586
Talar fractures	522	Metacarpals and fingers	586
Subtalar dislocation	530	25 Lower limb paediatric trauma	588
Talar dislocation	531	Pelvis and acetabulum	588
Calcaneal fractures	531	Pelvic fractures	588

Acetabular fractures	588	Patellar fracture	602
Hip	588	Proximal tibial fractures	602
Hip fractures	588	Tibial tuberosity fractures	603
Hip dislocation	591	Tibial diaphyseal fractures	604
Slipped capital femoral epiphysis	591	Toddler's fracture	605
Femur	594	Distal tibial metaphyseal fractures	605
Femoral shaft fractures	594	Ankle	606
Knee	599	Ankle fractures	606
Fractures of the distal femur	599	Foot	609
Patellar dislocation	600		
Tibial spine fracture and anterior cruciate ligament disruption	602	Index	611
