Series editor foreword	v
Preface	vii
Acknowledgements	ix
Dedication	xi

Part I: History, Examination and Common Investigations 1

1. Taking a history	3
Structure of the history	3
2. The neurological examination	7
Mental state and higher cerebral functions	7
Speech	8
Gait	10
Cranial nerves	10
The motor system	18
The sensory system	23
General examination	24
3. Further investigations	25
Routine investigations	25
Neurophysiological investigations	25
Imaging of the nervous system	29

Part II: The Patient Presents With 31

4. Disorders of higher cerebral function	33
Frontal lobe	33
Parietal lobe	35
Temporal lobe	36
Disphasia	37
Occipital lobe	37
5. Disturbances of consciousness	39
Transient loss of consciousness	39
Driving and episodes of disturbances of consciousness	42
Coma	42
Brainstem death	47

6. Headache	49
History	51
Examination	52
7. Disorders of smell and taste	53
Differential diagnosis	53
Examination	54
Investigations	55
8. Visual impairment	57
The anatomical path of light stimulation	57
Blood supply to the visual pathway	58
Clinical features to aid localization of a lesion	59
Differential diagnosis of visual loss	60
Optic atrophy	62
9. Disorders of the pupils and eye movements	63
Pupillary reflexes	63
Differential diagnosis of pupil disorders	64
Disorders of eye movements	66
10. Facial sensory loss and weakness	75
The trigeminal nerve	75
Differential diagnosis of facial sensory loss	75
Facial nerve	78
11. Deafness, tinnitus, dizziness and vertigo	81
Deafness and tinnitus	81
The auditory system	81
Differential diagnosis of deafness	81
Differential diagnosis of tinnitus	83
The vestibular system	84
Differential diagnosis of dizziness and vertigo	84
Investigations for vertigo	86
12. Dysarthria, dysphonia and dysphagia	89
Definitions	89
Dysarthria	89
Dysphagia	91
Dysphonia	91

13. Cerebellar dysfunction	93	Vasculitis	130
Clinical features of cerebellar dysfunction	93	Dementia as a part of other degenerative diseases	130
Localization of a cerebellar lesion	95	Pseudodementia	130
14. Movement disorders	97	19. Epilepsy	131
The anatomical basis and classification of movement disorders	97	Definitions	131
The hyperkinetic movement disorders: tremor and dystonia	97	Classification of seizures	131
Dystonia	99	Epidemiology	131
The hyperkinetic movement disorders: chorea, tics and myoclonus	101	Aetiology	131
15. Limb weakness	103	Clinical features	133
Neuroanatomy	103	History and investigations to aid diagnosis	134
Terminology	104	Differential diagnoses	135
Upper motor neuron weakness	104	Drug treatment	135
Upper motor neuron syndromes	105	Status epilepticus	137
Lower motor neuron weakness	107	Neurosurgical treatment of epilepsy	137
Lower motor neuron syndromes	108	Mortality of epilepsy	137
Disorders of the neuromuscular junction	110	Driving and epilepsy	138
Myopathy	110	20. Headache and craniofacial pains	139
16. Limb sensory symptoms	113	Tension-type headache	139
Dorsal (posterior) column pathway	113	Migraine	139
Spinothalamic pathway	113	Cluster headache	140
Trophic skin changes and ulcers	113	Other neurological causes of headache and craniofacial pain	141
Sensory syndromes	114	Non-neurological causes of headache and craniofacial pain	142
17. Disorders of gait	119	21. Parkinson's disease and other extrapyramidal disorders	145
Practical approach to the assessment of gait	119	Akinetic-rigid syndromes	145
Differential diagnosis of disorders of gait	120	Neuroleptic-induced movement disorders	150
Part III: Diseases and Disorders.	123	Restless legs syndrome	151
18. Dementia	125	22. Cranial nerve lesions	153
Definition	125	Olfactory nerve (first, I)	153
Differential diagnoses	125	Optic nerve (second, II)	153
Epidemiology	125	Oculomotor (third, III), trochlear (fourth, IV) and abducens nerves (sixth, VI)	154
General clinical features	125	Trigeminal nerve (fifth, V)	155
History	126	Facial nerve (seventh, VII)	156
Examination	126	Vestibulocochlear nerve (eighth, VIII)	157
Investigations	126	Lower cranial nerves (glossopharyngeal, vagus, accessory and hypoglossal)	158
Management	127		
Primary neurodegenerative dementias	128		

23. Diseases affecting the spinal cord (myelopathy)	159	30. Neuro-oncology	215
Anatomy	159	Types of intracranial tumour	215
Major pathways within the spinal cord	159	Clinical features of intracranial tumours	216
Causes of spinal cord disease	161	Investigations	218
24. Motor neuron disease	169	Treatment	219
Types and clinical features of motor neuron disease	169	Prognosis	219
Pathogenesis	170	Neurological complications of cancer	220
Differential diagnosis	171	31. Infections of the nervous system	223
Diagnosis	171	General conditions	223
Treatment	171	Specific organisms and their associated diseases	229
25. Radiculopathy and plexopathy	173	32. Multiple sclerosis	237
Anatomy	173	Epidemiology	237
Radiculopathy (spinal nerve root lesions)	173	Pathogenesis	237
Plexopathies	175	Pathology	237
26. Disorders of the peripheral nerves	177	Clinical features	237
Anatomy	177	Differential diagnosis	239
Definitions of neuropathies	177	Investigations	239
Symptoms of neuropathy	178	Diagnosis	240
Investigation of peripheral neuropathy	179	Management	240
Specific neuropathies	180	Other central demyelinating diseases	241
27. Disorders of the neuromuscular junction	189	33. Systemic disease and the nervous system	243
Myasthenia gravis	189	Endocrine disorders	243
Lambert-eaton myasthenic syndrome	191	Haematological disorders	244
Other myasthenic syndromes	192	Gastrointestinal disorders	244
Botulinum toxin	192	Renal disorders	245
28. Disorders of skeletal muscle	193	Vasculitides and connective tissue disorders	245
Anatomy	193	Cardiac disorders	245
Clinical features of muscle disease (myopathy)	193	Other multisystem diseases	245
Investigation of muscle disease	194	34. The effects of vitamin deficiencies and toxins on the nervous system	247
Specific diseases	195	Vitamin deficiencies	247
29. Vascular diseases of the nervous system	201	Toxins	248
Cerebrovascular disease	201	35. Hereditary conditions affecting the nervous system	251
Intracranial haemorrhage	209	The neurocutaneous syndromes	251
Cerebrovascular involvement in vasculitis	211	Hereditary ataxias	253
Cerebral venous thrombosis	211	Inherited neuropathies	253
Dissection	211	Inborn errors of metabolism	253
Vascular disease of the spinal cord	212		

Self-Assessment	255	EMQ answers	283
Single best answer questions (SBAs)	257	Objective structured clinical examination (OSCE) stations	285
Extended-matching questions (EMQs)	267	Glossary	289
SBA answers	273	Index	293
