## PART I. TRAUMA SYSTEMS

---

Development of Trauma Systems	1
Donald D. Trunkey	
Trauma Center Organization and Verification (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	5
Brian Estridge and Erwin Thal	
Injury Severity Scoring: Its Definition and Practical Application (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	6
Turner M. Osler, Laurent G. Glance, and Edward J. Bedrick	
Role of Alcohol and Other Drugs in Trauma (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	6
Gary M. Genellelo and Thomas J. Esposito	
Role of Trauma Prevention in Reducing Interpersonal Violence (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	6
Edward E. Cornwell and David C. Chang	
Trauma Scoring (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	6
Nicole VanDerHeyden and Thomas B. Cox	
Results of the Medical Strategy for Military Trauma in Colombia	7
William Sanchez Maldonado, Erwin Rodriguez García, David Rojas Tirado, and Juan A. Asensio	

## PART II. PREHOSPITAL TRAUMA CARE

---

Influence of Emergency Medical Services on Outcome at Trauma Center	15
David Szasz	
Field Triage in the Military Arena (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	17
Jeffrey A. Bailey and Alan D. Murdock	
Field Triage in the Civilian Arena (chapter online at <a href="http://www.ExpertConsult.Inkling.com">www.ExpertConsult.Inkling.com</a> )	17
Nann Brazel, John Weigelt, and Jennifer C. Roberts	

Prehospital Airway Management: Intubation, Devices, and Controversies	18
---	----

Raul Coimbra, Jay Doucet, and David Hoyt

Prehospital Fluid Resuscitation: What Type, How Much, and Controversies	24
---	----

Adam M. Shiroff, Vincente H. Gracias, and Michael F. Rotondo

Civilian Hospital Response to Mass Casualty Events	27
--	----

Rochelle A. Dicker and William P. Schecter

Injuries from Explosives	33
--------------------------	----

Howard R. Champion

Prehospital Care of Biologic Agent-Induced Injuries	38
---	----

Kenneth G. Swan, Charles D. Mabry, and Juan A. Asensio

Wound Ballistics: What Every Trauma Surgeon Should Know	45
---	----

Laszlo Kiraly, John C. Mayberry, and Donald D. Trunkey

Common Prehospital Complications and Pitfalls in the Trauma Patient	50
---	----

Frank L. Mitchell, Charles M. Richart, and Harry E. Wilkins

## PART III. INITIAL ASSESSMENT AND RESUSCITATION

---

Airway Management: What Every Trauma Surgeon Should Know, From Intubation to Cricothyroidotomy	57
--	----

Andrew R. Doben and Ronald I. Gross

Resuscitation Fluids	70
----------------------	----

Ron Barbosa, Brandon Tieu, Laszlo Kiraly, Michael Englehart, Martin Schreiber, and Susan Rowell

Resuscitative Thoracotomy	76
---------------------------	----

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Wendy Jo Svetanoff, Molly Hartmann, Eric Elster, G. Daniel Pust, and Michel Wagner

Focused Assessment with Sonography for the Trauma Patient	88
---	----

Andrés M. Rubiano, Glyn Estebanez, and Aurelio Rodríguez

Role of Radiology in Initial Trauma Evaluation	99
--	----

Kim M. Caban, Gary H. Danton, Anthony M. Durso, Felipa Munera, and Luis A. Rivas

Interventional Radiology: Diagnostic and Therapeutic Roles 116  
David J. Quintana, Jason Salsamendi, and Felipa Munera

Endpoints of Resuscitation 123  
Susan Rowell, Ronald Barbosa, Michael Englehart, Brandon Tieu, and Martin Schreiber

#### PART IV. HEAD AND CENTRAL NERVOUS SYSTEM INJURIES

Traumatic Brain Injury: Pathophysiology, Clinical Diagnosis, and Prehospital and Emergency Center Care 127  
Aileen Ebadat and Alex B. Valadka

Traumatic Brain Injury: Imaging, Operative and Nonoperative Care, and Complications 133  
Aileen Ebadat and Alex B. Valadka

Spine: Spinal Cord Injury, Blunt and Penetrating, Neurogenic and Spinal Shock 140  
Vartan S. Tashjian, Nestor R. Gonzalez, and Larry T. Khoo

#### PART V. MAXILLOFACIAL AND OCULAR INJURIES

Maxillofacial Trauma 153  
Urmen Desai, Rosaine Roeder, Benjamin T. Lemelman, and Seth R. Thaller

Trauma to the Eye and Orbit 162  
Mario A. Meallet and Bibiana J. Reiser

#### PART VI. NECK INJURIES

Penetrating Neck Injuries: Diagnosis and Current Management 179  
Leonard J. Weireter, Jr. and L.D. Britt

Blunt Cerebrovascular Injuries 185  
Clay Cothren Burlew and Ernest E. Moore

Tracheal, Laryngeal, and Oropharyngeal Injuries 192  
Luis G. Fernández, Scott H. Norwood, and John D. Berne

#### PART VII. THORACIC INJURIES

Pertinent Surgical Anatomy of the Thorax and Mediastinum 205  
Brandon Tieu, Paul Schipper, Mithran Sukumar, and John C. Mayberry

Thoracic Wall Injuries: Ribs, Sternal, and Scapular Fractures; Hemothoraces and Pneumothoraces 229  
David H. Livingston, Carl Hauser, Noelle Salliant, and Devashish J. Anjaria

Diagnostic and Therapeutic Roles of Bronchoscopy and Video-Assisted Thoracoscopy in the Management of Thoracic Trauma 238  
Ajai K. Malhotra, Michel B. Aboutanos, and Therese M. Duane

Pulmonary Contusion and Flail Chest 245  
Carl Hauser, Noelle Salliant, and David H. Livingston

Operative Treatment of Chest Wall Injury 254  
R. Stephen Smith and Juan A. Asensio

Tracheal and Tracheobronchial Tree Injuries 257  
Preston R. Miller and J. Wayne Meredith

Operative Management of Pulmonary Injuries: Lung-Sparing and Formal Resections 260  
Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Thomas Templin, Shreya Shetty, G. Daniel Pust, Kirby R. Gross, and Marcus Balters

Complications of Pulmonary and Pleural Injury 274  
Thomas K. Varghese, Jr., Riyad Karmy-Jones, and Gregory J. Jurkovich

Cardiac Injuries 281  
Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Zachary Torgersen, Brian Biggerstaff, Brittney J. Maloley-Lewis, Pulkesh Bhatia, Jeffery A. Bailey, Juan A. Sanchez, and Elias Degiannis

Thoracic Vascular Injury 290  
Peter I. Tsai, Ramyar Gilani, Kenneth L. Mattox, and Matthew J. Wall, Jr.

Open and Endovascular Management of Thoracic Aortic Injuries 296  
K. Shad Pharaon and Donald D. Trunkey

Treatment of Esophageal Injury 302  
A. Britton Christmas and J. David Richardson

#### PART VIII. ABDOMINAL INJURIES

Diaphragmatic Injury 307  
Charles E. Lucas and Anna M. Ledgerwood

Surgical Anatomy of the Abdomen and Retroperitoneum 316  
Joe DuBose and Thomas M. Scalea

Diagnostic Peritoneal Lavage and Laparoscopy in the Evaluation of Abdominal Trauma 323  
Amy Rushing and David T. Efron

Nonoperative Management of Blunt and Penetrating Abdominal Injuries 326  
Matthew J. Martin and Peter Rhee

Gastric Injuries 336  
Lawrence N. Diebel

Small Bowel Injury 339  
Kimball Maul

Duodenal Injuries 346  
Gregory J. Jurkovich

Pancreatic Injuries and Pancreaticoduodenectomy 352  
Louis J. Magnotti and Martin A. Croce

Liver Injury 358  
Manish S. Parikh, Susan I. Brundage, and H. Leon Pachter

Splenic Injuries 373  
Joseph M. Galante and David H. Wisner

Abdominal Vascular Injury 381  
Christopher J. Dente and David V. Feliciano

## Colon and Rectal Injuries 391

David J. Ciesla

## Genitourinary Tract Injuries 395

Lucas R. Wiegand and Steven B. Brandes

## Gynecologic Injuries: Trauma to Gravid and Nongravid Uterus and Female Genitalia 401

Patrizio Petrone and Areti Tillou

## Multidisciplinary Management of Pelvic Fractures: Operative and Nonoperative Management 407

Thomas M. Scalea and Deborah M. Stein

PART IX. SPECIAL ISSUES IN MAJOR TRUNSO  
TRAUMA

## Current Concepts in the Diagnosis and Management of Hemorrhagic Shock 415

Juan Carlos Puyana, Samuel Tisherman, and Andrew B. Peitzman

## The Syndrome of Exsanguination: Reliable Models to Indicate Damage Control 422

Juan A. Asensio, Robert Bertelotti, Federico N. Mazzini, José Ceballos Esparragon, Chris Okwuosa, Steven Cheung, Riaan Pretorius, Luis Manuel García-Núñez, and Alicia M. Mohr

## Damage Control Resuscitation: An Evidence-Based Report 425

Juan C. Duchesne, Chrissy Guidry, Louis A. Aliperti, Lance E. Stuke, and Norman E. McSwain, Jr.

## Surgical Techniques for Thoracic, Abdominal, Pelvic, and Extremity Damage Control 430

Greta L. Piper, Kimberly A. Davis, and Fred A. Luchette

## Abdominal Compartment Syndrome, Damage Control, and the Open Abdomen 435

Oliver L. Gunter, Jr., Nathan J. Powell, and Richard S. Miller

## Trunso Trauma on the Modern Battlefield 446

Colonel Matthew J. Martin and Colonel Brian Eastridge

## PART X. PERIPHERAL VASCULAR INJURY

## Vascular Anatomy of the Extremities 457

Norman M. Rich and David R. Welling

## Diagnosis of Vascular Trauma 459

John T. Anderson and F. William Blaisdell

## Penetrating Carotid Artery: Uncommon Complex and Lethal Injuries 463

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Joe DuBose, Irany C. Sade, Erin Hale, Peter Collister, Thomas P. Brush, and Frank Plani

## Subclavian Vessel Injuries: Difficult Anatomy and Difficult Territory 469

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Mamoun Nabri, Gerald Gracia, Michael Ksycki, Paul W. White, and Robert F. Wilson

## Operative Exposure and Management of Axillary Vessel Injuries 476

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Angela Osmolak, Jason Loden, Gerald Gracia, Michael Ksycki, D'Andrea Joseph, Takashi Fujita, and Yasuhiro Otomo

## Brachial Vessel Injuries: High Morbidity and Low Mortality Injuries 481

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Parth Shah, Austin Person, Anthony M. Udekwo, John K. Bini, and Ari Leppäniemi

## Iliac Vessel Injuries: Difficult Injuries and Difficult Management Problems 487

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Richard Denney, Gerald Gracia, Michael Ksycki, Bradley S. Putty, James B. Sampson, and Robert F. Wilson

## Femoral Vessel Injuries: High Mortality and Low Morbidity Injuries 494

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Kulsoom Laeeq, Abishek Sundaram, Mamoun Nabri, Brandon Propper, and William G. Cioffi

## Popliteal Vessel Injuries: Complex Anatomy and High Amputation Rates 504

Juan A. Asensio, Patrizio Petrone, Alejandro Perez-Alonso, Mark Traynham, Ananth Srinivasan, Stephen Serio, Jeremy Cannon, and John T. Owings

## Temporary Vascular Shunts 518

David V. Feliciano

PART XI. MUSCULOSKELETAL AND PERIPHERAL  
CENTRAL NERVOUS SYSTEM INJURIES

## Upper Extremity Fractures: Orthopaedic Management 523

Steven Kalendiak and Stephen M. Quinnan

## Lower Extremity and Degloving Injury 535

Peter G. Trafton, Herman P. Houin, and Donald D. Trunkey

## Cervical, Thoracic, and Lumbar Fractures 540

Nicholas Spoerke and Donald D. Trunkey

## Pelvic Fractures 544

Christopher H. Perkins and Stephen M. Quinnan

Wrist and Hand Fractures: Orthopaedic Management of Current Therapy of Trauma and Surgical Critical Care (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 550

Patrick Owens

Scapulothoracic Dissociation and Degloving Injuries of the Extremities (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 550

Walter L. Biffi and Kyros Ipaktchi

Extremity Replantation: Indications and Timing (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 550

Haaris Mir, Morad Askari, and Zubin Jal Panthaki

Special Techniques for the Management of Complex Musculoskeletal Injuries: The Roles of Fasciocutaneous and Myocutaneous Flaps (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 551

Christopher Salgado, Ari Hoschander, and John Oeltjen

## PART XII. SPECIAL ISSUES AND SITUATIONS IN TRAUMA MANAGEMENT

Airway Management: What Every Surgeon Should Know about the Traumatic Airway (The Anesthesiologist's Perspective) 553

Shawn M. Cantie and Edgar J. Pierre

Pediatric Trauma 556

David W. Tuggle and L.R. Tres Scherer

Trauma in Pregnancy 561

Amy C. Sisley and William C. Chiu

Trauma in our "Elders" 567

Daniel J. Grabo, Benjamin M. Braslow, and C. William Schwab

Burns 571

John T. Schulz III, Kimberly A. Davis, and Richard L. Gamelli

Soft Tissue Infections 582

Sharon Henry

Common Errors in Trauma Care 593

R. Stephen Smith, Allan S. Philp, and Stepheny D. Berry

Combat Trauma Care: Lessons Learned from a Decade of War 598

Matthew J. Martin and Brian Eastridge

## PART XIII. CRITICAL CARE I: MANAGEMENT OF ORGAN FAILURES AND TECHNIQUES FOR SUPPORT

Cardiac Hemodynamics: The Pulmonary Artery Catheter and the Meaning of Its Readings 607

D. Dante Yeh, Mitchell J. Cohen, and Robert C. Mackerseie

Oxygen Transport 613

Patricio Polanco, Juan Carlos Puyana, Mitchell Fink, and Andrew B. Peitzman

Pharmacologic Support of Cardiac Failure 616

John W. Mah and Orlando C. Kirton

Diagnosis and Management of Cardiac Dysrhythmias 621

Kareem R. Abdelfattah and Joseph P. Minei

Fundamentals of Mechanical Ventilation 628

Soumitra R. Eachempati, Jerry A. Rubano, Jared M. Huston, Philip S. Barie, and Marc J. Shapiro

Advanced Techniques in Mechanical Ventilation 639

Jared M. Huston, Marc J. Shapiro, Soumitra R. Eachempati, and Philip S. Barie

Management of Renal Failure: Renal Replacement Therapy and Dialysis 644

Joseph M. Gutmann, Christopher McFarren, Lewis M. Flint, and Rodney Durham

Management of Coagulation Disorders in the Surgical Intensive Care Unit 650

Christopher P. Michetti and Samir M. Fakhry

Management of Endocrine Disorders in the Surgical Intensive Care Unit 658

Anthony Falvo and Mathilda Horst

Transfusion: Management of Blood and Blood Products in Trauma 665

Lena M. Napolitano

## PART XIV: CRITICAL CARE II: SPECIAL ISSUES AND TREATMENTS

Acute Respiratory Distress Syndrome 679

Matthew C. Bozeman, Keith R. Miller, Nicholas A. Nash, and Jorge L. Rodriguez

Systemic Inflammatory Response Syndrome and Multiple-Organ Dysfunction Syndrome: Definition, Diagnosis, and Management 683

Gregory Tiesi, Leonard Mason, Benjamin Chandler, Anthony Watkins, David Palange, and Edwin A. Deitch

Sepsis, Septic Shock, and Its Treatment 689

Marini Corrado Paolo, Gary Lombardo, Anthony Policastro, and Dimitryi Karev

Immunology of Trauma 696

Christine S. Cocanour and S. Rob Todd

Overview of Infectious Diseases in Trauma Patients 701

Donald E. Fry

Nosocomial Pneumonia 709

Paul M. Maggio and David A. Spain

Antibiotic Use in the Intensive Care Unit: The Old and the New 715

Philip S. Barie

Fungal Colonization and Infection During Critical Illness 725

Marc J. Shapiro, Eduardo Smith-Singares, Soumitra R. Eachempati, Jared M. Huston, and Philip S. Barie

Preoperative and Postoperative Nutritional Support: Strategies for Enteral and Parenteral Therapies 733

Patricia Marie Byers, S. Morad Hameed, and Stanley J. Dudrick

Venous Thromboembolism: Diagnosis and Treatment 742

Susan Evans and Ronald Sing

Hypothermia and Trauma 750

Larry M. Gentilello and R. Lawrence Reed II

Surgical Procedures in the Surgical Intensive Care Unit (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 755

Ziad C. Sifri and Alicia M. Mohr

Anesthesia in the Critical Care Unit and Pain Management (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 755

Andrew Loukas, Shawn M. Cantie, and Edgar J. Pierre

Diagnostic Management of Brain Death in the Intensive Care Unit and Organ Donation (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 755

Darren Malinoski and Ali Salim

## PART XV: REHABILITATION AND QUALITY OF LIFE AFTER TRAUMA AND OTHER ISSUES

Palliative Care in the Trauma Intensive Care Unit (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 757

Anastasia Kunac and Anne C. Mosenthal

Trauma Rehabilitation (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 757

Wayne Dubov, Joseph J. Stirparo, and Michael D. Pasquale

Trauma Outcomes (chapter online at [www.ExpertConsult.Inkling.com](http://www.ExpertConsult.Inkling.com)) 757

Glen Tinkoff and Michael Rhodes

Index 759

**DEVELOPMENT OF TRAUMA**

The history of trauma care is a long and complex one, spanning centuries and continents. It is a story of human resilience, innovation, and the relentless pursuit of better ways to care for the injured. From the ancient world to the modern era, the evolution of trauma care has been shaped by a combination of medical advances, technological progress, and the changing nature of warfare and accidents.

In the ancient world, trauma care was often rudimentary, focusing on basic wound care and the use of natural remedies. However, the development of organized military medicine during the Middle Ages marked a significant step forward. The establishment of military hospitals and the training of military surgeons laid the foundation for modern trauma care. The Crusades, in particular, led to the exchange of medical knowledge between the East and the West, as soldiers from both sides learned from each other's medical practices.

The Renaissance brought a renewed interest in anatomy and surgery, leading to significant advances in the treatment of wounds and fractures. The work of surgeons like Ambroise Paré, who introduced the use of gunpowder ointment to treat gunshot wounds, and the development of the tourniquet by John Hunter, were pivotal moments in the history of trauma care. The 19th century saw the birth of modern surgery, with the introduction of anesthesia and the development of the operating room. This period also saw the rise of military medicine, as the scale of warfare increased and the need for organized medical services grew.

The 20th century brought further advances, including the development of antibiotics, the use of blood transfusions, and the establishment of trauma centers. The Vietnam War, in particular, led to the development of the modern trauma center, with its emphasis on rapid resuscitation, definitive care, and rehabilitation. The establishment of the National Surgical and Adjuvant Breast and Bowel (NSAB) Breast and Bowel Project (NSABP) in 1973 was a landmark event, as it established the first modern trauma center in the United States. This model of care, which emphasizes the importance of a multidisciplinary approach to trauma care, has become the standard for trauma centers worldwide.

The 21st century has seen continued progress in trauma care, with the development of new technologies, such as minimally invasive surgery and the use of robotics. The emphasis on patient-centered care and the importance of rehabilitation in the management of trauma patients has also become a key focus. The future of trauma care lies in the continued development of these technologies and the integration of evidence-based medicine into clinical practice. As we move forward, the goal remains the same: to provide the best possible care for the injured and to improve the quality of life for those who survive.

From elsewhere in the world, the military doctors that were provided for the soldiers and sailors were a source of trauma care that rivaled that of the home country. The first written during the reign of Akbar (1556-1605) was a military medical manual that described the treatment of wounds and fractures in the Indian army. It was a comprehensive work that covered the treatment of wounds, fractures, and other injuries. It was written in a simple and practical style, and it was designed to be used by soldiers and medical personnel in the field. The manual was a significant contribution to the development of military medicine, and it influenced the development of military medicine in other parts of the world.

Over the next century, military medicine continued to evolve. The major advances of the 17th century were the development of military surgeons, the use of the tourniquet, and the development of the Age of Enlightenment. The work of Ambroise Paré, who introduced the use of gunpowder ointment to treat gunshot wounds, and the development of the tourniquet by John Hunter, were pivotal moments in the history of trauma care. The 19th century saw the birth of modern surgery, with the introduction of anesthesia and the development of the operating room. This period also saw the rise of military medicine, as the scale of warfare increased and the need for organized medical services grew.

The 20th century brought further advances, including the development of antibiotics, the use of blood transfusions, and the establishment of trauma centers. The Vietnam War, in particular, led to the development of the modern trauma center, with its emphasis on rapid resuscitation, definitive care, and rehabilitation. The establishment of the National Surgical and Adjuvant Breast and Bowel (NSAB) Breast and Bowel Project (NSABP) in 1973 was a landmark event, as it established the first modern trauma center in the United States. This model of care, which emphasizes the importance of a multidisciplinary approach to trauma care, has become the standard for trauma centers worldwide.

The 21st century has seen continued progress in trauma care, with the development of new technologies, such as minimally invasive surgery and the use of robotics. The emphasis on patient-centered care and the importance of rehabilitation in the management of trauma patients has also become a key focus. The future of trauma care lies in the continued development of these technologies and the integration of evidence-based medicine into clinical practice. As we move forward, the goal remains the same: to provide the best possible care for the injured and to improve the quality of life for those who survive.
