1. Nonneoplastic diseases of the kidney <i>Stephen M. Bonsib</i>	1
2. Neoplasms of the kidney <i>Gregory T. MacLennan and Liang Cheng</i>	74
3. Renal pelvis and ureter <i>Stephen M. Bonsib and Liang Cheng</i>	158
4. Fine needle aspiration of the kidney <i>Andrew A. Renshaw</i>	176
5. Nonneoplastic disorders of the urinary bladder <i>Robert H. Young</i>	194
6. Neoplasms of the urinary bladder <i>Liang Cheng, Antonio Lopez-Beltran, Gregory T. MacLennan, Rodolfo Montironi, and David G. Bostwick</i>	228
7. Urine cytology <i>Deoar Hossain, David Hull, and David G. Bostwick</i>	318
8. Nonneoplastic diseases of the prostate <i>David G. Bostwick, David Hull, Jun Ma, and Deoar Hossain</i>	350
9. Neoplasms of the prostate <i>David G. Bostwick, Liang Cheng, and Isabelle Meiers</i>	408
10. Seminal vesicles <i>David G. Bostwick</i>	532
11. Urethra <i>Victor E. Reuter</i>	542
12. Nonneoplastic diseases of the testis <i>Manuel Nistal, Ricardo Paniagua, and Pilar González-Peramato</i>	560
13. Neoplasms of the testis <i>Thomas M. Ulbright and Robert E. Emerson</i>	736
14. Spermatic cord and testicular adnexa <i>David G. Bostwick</i>	830
15. Penis and scrotum <i>Jae Y. Ro, Mukul Divatia, Kyu-Rae Kim, Mahul B. Amin, and Alberto G. Ayala</i>	850
16. Adrenal glands <i>Ernest E. Lack and Edina Paal</i>	902
Index	947

CHAPTER OUTLINE

Embryologic development and normal structure

Pronephros	3
Mesonephros	3
Metanephros	4
Nephron differentiation	6
Gross anatomy	7
Microscopic anatomy	10

Parenchymal maldevelopment and cystic kidney diseases

Abnormalities in form and position	12
Abnormalities in mass and number	14
Renal dysplasia	19
Polycystic kidney disease	23
Cystic diseases (without dysplasia) in hereditary syndromes	26
Miscellaneous diseases	31

Vascular diseases

Hypertension-associated renal disease	33
Thrombotic microangiopathy	35
Renal artery stenosis	36
Renal artery dissection	40
Renal artery aneurysm	40
Arteriovenous malformation and fistula	41
Renal emboli and infarcts	41
Renal cortical necrosis	42
Renal papillary necrosis	43
Renal cholesterol microembolism syndrome	43
Renal artery thrombosis	44
Renal vein and renal venous thrombosis	44
Bartter syndrome	45
Vasculitis	45

Tubulointerstitial disease

Acute and chronic renal failure	47
Acute tubular injury (necrosis)	47
Acute tubulointerstitial nephritis	48
Herbal remedies and slimming agents and aristocholic acid nephropathy	50
Immunoglobulin G4-related sclerosing tubulointerstitial nephritis	50
Analgesic nephropathy	51
Bacterial infection-associated tubulointerstitial disease	52
Viral infections	55
Granulomatous tubulointerstitial disease	56

Metabolic abnormalities, heavy metals, and crystal-associated tubulointerstitial diseases

Heavy metals	59
Hypercalcemic nephropathy	59
Nephrolithiasis	60
Oxalate-associated renal disease	60
Cystinosis	62
Uric acid-associated renal disease	63

Amyloidosis and paraprotein-associated tubulointerstitial disease

Amyloidosis	64
Light chain cast nephropathy	66
Immunoglobulin and light chain deposition disease	66
Light chain proximal tubulopathy	67
Crystal-storing histiocytosis	68

Renal transplantation

Rejection	68
-----------	----

T-cell-mediated rejection

Calcineurin inhibitor nephrotoxicity	72
--------------------------------------	----
