UNIT I Informatics Basics	1	13 Mobile Computing: Finding Knowledge in the Palm of Your Hand	215
1 Introduction to Nursing Informatics: Managing Healthcare Information	3		
2 Meet the Computer	21		
3 Software: Information Management	44		
4 Understanding Computer Concepts: Common Features	58		
5 Computers and Networking	77		
UNIT II Computers and Your Professional Career	99	UNIT IV The New Healthcare Paradigm	229
6 Professional Networking	101	14 The Consumer and the Electronic Health Record	231
7 Word Processing	120	15 The Empowered Consumer	248
8 Presentation Software: Looking Professional in the Spotlight	133	16 Interoperability at the International and National Level	266
9 Spreadsheets: Making Numbers Talk	144	17 Nursing Documentation: Is It Valuable?	286
10 Databases: Creating Information From Data	160		
UNIT III Information Competency	183	UNIT V Healthcare Informatics	307
11 The Internet: One Road to Health and Evidence-Based Practice Information	185	18 The Informatics Discipline	309
12 Finding Knowledge in the Digital Library Haystack	199	19 Basic Electronic Healthcare Information Systems	329
		20 Specialized Electronic Healthcare Information Systems	347
		21 Electronic Healthcare System Issues	359
		22 Carrying Healthcare to the Client	376

**UNIT VI Computer Uses in Healthcare
Beyond Clinical
Informatics 389**

23 Educational Informatics: e-Learning 391

24 Administration Tools for Efficiency 409

25 Informatics and Research 423

26 Legal and Ethical Issues 436

Index 447
