

Contents

Contributors		
Preface		
Acknowledgments		
1. Anatomic Considerations and Examination of Cardiovascular Specimens (Excluding Devices)		
J.J. MOLESZEWSKI, C.K. LAI AND J.P. VEINOT		
Gross Examination of the Heart		
Examination of Surgical Cardiovascular Specimens		
Microscopic Examination of the Blood Vessels and Heart		
References		
2. Age-related Cardiovascular Changes and Diseases		
A. SEKI AND M.C. FISHBEIN		
Nonspecific Cardiovascular Changes of Aging		
Changes in the Conduction System		
Changes in Arteries		
Age-related Diseases		
Disorders of Premature Aging		
Telomere		
References		
3. Vascular Pathobiology: Atherosclerosis and Large Vessel Disease		
S. YILMAZ, M. BENDECK AND A.I. GOTLIEB		
Introduction to Atherosclerosis		
Epidemiology and Risk Factors		
Gross and Microscopic Morphology of the Fibroinflammatory Lipid Plaque		
Steps in Atherosclerotic Plaque Formation and Complications		
Cellular Function and Pathways in Atherogenesis		
Nonatherosclerotic Diseases of the Aorta		
References		
4. Diseases of Small and Medium-sized Blood Vessels		
J.R. STONE		
Introduction		
Vascular Activation and Common Vascular Pathologic Changes		
Congenital Vascular Diseases		
Genetic Vascular Disorders		
Endocrine/Metabolic Vascular Disorders		
Vasculitis		
Infection		
Toxic Vasculopathies		
Coagulopathic Disorders		
Hypertension		
Vascular Deposition Disorders		
Intimal Proliferative Diseases		
Arterial Dissections		
Miscellaneous Conditions		
Disorders of Veins		
References		
5. Aneurysms of the Aorta: Ascending, Thoracic and Abdominal and Their Management		
E. LADICH, J. BUTANY AND R. VIRMANI		
Introduction		
Normal Anatomy and Histology of the Aorta		
Aging Changes of the Aorta		
Thoracic Aortic Aneurysms		
Etiology and Pathologic Findings		
Clinical Presentation and Natural History		
Abdominal Aortic Aneurysm		
Aortic Dissection		
Management		
References		
6. Fundamental Principles in Cardiovascular Genetics		
M.A. SEIDMAN AND R.N. MITCHELL		
Genetic Variation		
Modern Molecular Diagnostics		
Identifying the Genetic Basis of Cardiovascular Disease		
Representative Genetic Cardiovascular Conditions		
Molecular Diagnostics in Cardiovascular Pathology Practice		
References		
7. Myocardial Ischemia and Its Complications		
G.A. FISHBEIN, M.C. FISHBEIN AND L.M. BUJA		
Definition and History		
Clinical Manifestations		
Epidemiology		
Biochemical Changes with Ischemia and Biochemical Markers		
Ultrastructural Evolution of Acute Ischemic Injury		
Cellular and Subcellular Mechanisms of Myocardial Injury		
Microscopic Evolution of Acute Ischemic Injury		
Morphology of Coronary Arteries and Plaques		

Tako-Tsubo Cardiomyopathy	251	Hypertrophic Cardiomyopathy	446
Gross Evolution of Acute Ischemic Injury	251	Arrhythmogenic Cardiomyopathy	460
Patterns of MI	252	Restrictive Cardiomyopathy	468
Phenomena Associated with Ischemic Injury	253	Others	476
Reperfusion of Ischemic Myocardium	256	References	479
Complications of MI	257		
Recognition and Quantification of Acute Ischemic Injury	261	12. Valvular Heart Disease	485
Pathology of Interventions	263	P. VAIDEESWAR AND J. BUTANY	
Pathophysiological and Pharmacological Interventions	265		
Molecular Biology of Myocardial Ischemia	265	Introduction	485
References	266	Functional Anatomy	486
		Types of Valvular Dysfunction	487
		References	526
8. Pathophysiology of Heart Failure and an Overview of Therapies	271		
J.M. BERTHIAUME, J.A. KIRK, M.J. RANEK, R.C. LYON, F. SHEIKH, B.C. JENSEN, B.D. HOIT, J. BUTANY, M. TOLEND, V. RAO AND M.S. WILLIS		13. Cardiac Valve Replacement and Related Interventions	529
		F.J. SCHOEN AND J. BUTANY	
Overview of Heart Failure	272		
Pathophysiology of HF	276	General Considerations	530
Neurohormonal Alterations in HF	281	Valve-related Complications: Clinical Importance, Morphology, Secondary Effects, and Pathogenesis	540
Signaling Responses to Various Stimuli During HF	283	Other Tissue Valve Substitutes	551
HF-related Alterations in Cellular Function and Biochemical Pathways	293	Catheter-based Valve Implantation	555
Metabolic Remodeling in HF	299	Valve Repair and Valve Sparing Procedures	558
Summary of HF	306	New Developments and Future Considerations	562
Therapeutic Management of HF	306	Pathologic Considerations in Analysis of Heart Valve Substitutes	562
References	324	Disclosure	568
		Appendix	568
		References	569
9. Myocarditis	341		
M.A. SEIDMAN AND B.M. McMANUS		14. The Pathology of Cardiovascular Interventions and Devices for Coronary Artery Disease, Vascular Disease, Heart Failure, and Arrhythmias	577
		L.M. BUJA AND F.J. SCHOEN	
Definition of Myocarditis	341		
Diagnosis of Myocarditis	342	Endovascular Therapies and Myocardial Revascularization	578
Histopathologic Patterns of Myocarditis	345	Aortic and Peripheral Vascular Replacement and Reconstruction	591
Etiologies of Myocarditis	349	Cardiac Assist and Replacement	598
Treatment of Myocarditis	356	Arrhythmia Control	600
References	357	References	605
10. Pathology of Sudden Death, Cardiac Arrhythmias and Conduction System	361		
G. THIENE, S. RIZZO AND C. BASSO		15. Congenital Heart Disease: Pathology, Natural History, and Interventions	611
		G. OTTAVIANI AND L.M. BUJA	
Sudden Death	362		
Cardiac Conduction System	399	Introduction	611
Atrial Fibrillation	417	Epidemiology and Etiology	612
Appendix Guidelines for Postmortem Study of Sudden Death	420	Embryology of the Cardiovascular System	615
Acknowledgments	423	Clinical Features and Consequences	620
References	423	Specific Forms of CHD	621
		Surgical and Nonsurgical Interventions for Treatment of CHD	639
11. Cardiomyopathies	435	CHD in the Adult	641
G. d'AMATI AND C. GIORDANO		Natural History of CHD without and with Interventions	644
		References	644
Definition and Classification of Cardiomyopathies	436		
Dilated Cardiomyopathy	437		

16. The Pericardium and Its Diseases

P. SINGHAL, P. THAVENDIRANATHAN AND J. BUTANY

Anatomy	650
Physiology	650
Histology	650
Echocardiography	651
Pericardiocentesis and Biopsy	651
Congenital Abnormalities	651
Pericardial Effusion After Cardiac Surgery	654
Pneumopericardium	654
Early Postmyocardial Infarction Pericarditis and Dressler Syndrome	663
Iatrogenic and Traumatic Pericarditis	664
References	674

17. Pathology of Cardiac Transplantation

C.D. TAN, M.K. HALUSHKA AND E.R. RODRIGUEZ

General Clinicopathologic Considerations	680
Pathology of the Explanted Recipient Heart	681
Pathology of the Donor Heart	683
Pathology of the Allograft	684
Heart Transplantation in Combination with Other Organs	706
Pathological Review of an EMB	706
Approach to the Examination of a Failed Allograft	709
Future Considerations	711
References	711

18. Toxins and the Heart

M.C. FISHBEIN

Introduction	721
Endocardium	722
Myocardium	723
Pericarditis	728
Primary Conduction System Abnormalities	729
Coronary Artery Lesions	730
Cocaine-Other Drug Interactions	731
Drugs to Treat Attention Deficit-Hyperactivity Disorders	731
Antipsychotic Medications	731
Nonsteroidal Anti-inflammatory Drugs	731

649	Myocardial Toxins as a Cause of Death	732
	References	732

19. Tumors of the Cardiovascular System: Heart and Blood Vessels

E. LADICH AND R. VIRMANI

650		735
650		
651	Incidence and Classification	736
651	Clinical Symptoms	737
654	Reactive Cardiac Masses and Pseudotumors	737
654	Ectopias	740
663	Hamartomas and Benign Neoplasms	742
664	Hamartomas of Cardiac Muscle	743
674	Benign Fatty Tumors	745
	Benign Tumors of Myofibroblastic Tissue	746
679	Miscellaneous Benign Fibrous Tumors	747
	Cardiac Myxoma	748
	Benign Neural Neoplasms	753
	Malignant Tumors	755
	Metastatic Tumors	760
	Sarcomas of the Great Vessels	762
	References	766

20. Forensic Aspects of Cardiovascular Pathology

B. SAMPSON AND J.L. HAMMERS

711	Investigative Information	773
	General Changes	774
721	Primary Diseases/Injuries of the Heart	775
	Cardiomyopathies, Myocarditis, and Genetic Causes of SCD	781
	Anomalies and Diseases of the Aorta and Coronary Arteries	783
	Diseases of the Cardiac Valves	787
	Ancillary Studies	792
	Sudden Death Following Surgery and Medical Procedures	793
	Organ and Tissue Harvesting	794
	Cardiovascular Pathology Consultation	795
	Summary	795
	References	796

731	Index	799
