# WELLBEING in HPE & e-Portfolio Use

Visiting Medical Education Scholar Webinar | Faculty of Medicine, Mahidol University

**DISCUSS**

**CONCEPT**

Discuss the concept of wellbeing and e-portfolio in HPE

**REFLECT**

**ISSUES**

Reflect on the wellbeing & e-portfolio issues in HPE

**EXPLORE**

**WELLBEING STRATEGIES**

Explore wellbeing strategies by considering the connections between wellbeing and e-portfolio use in HPE

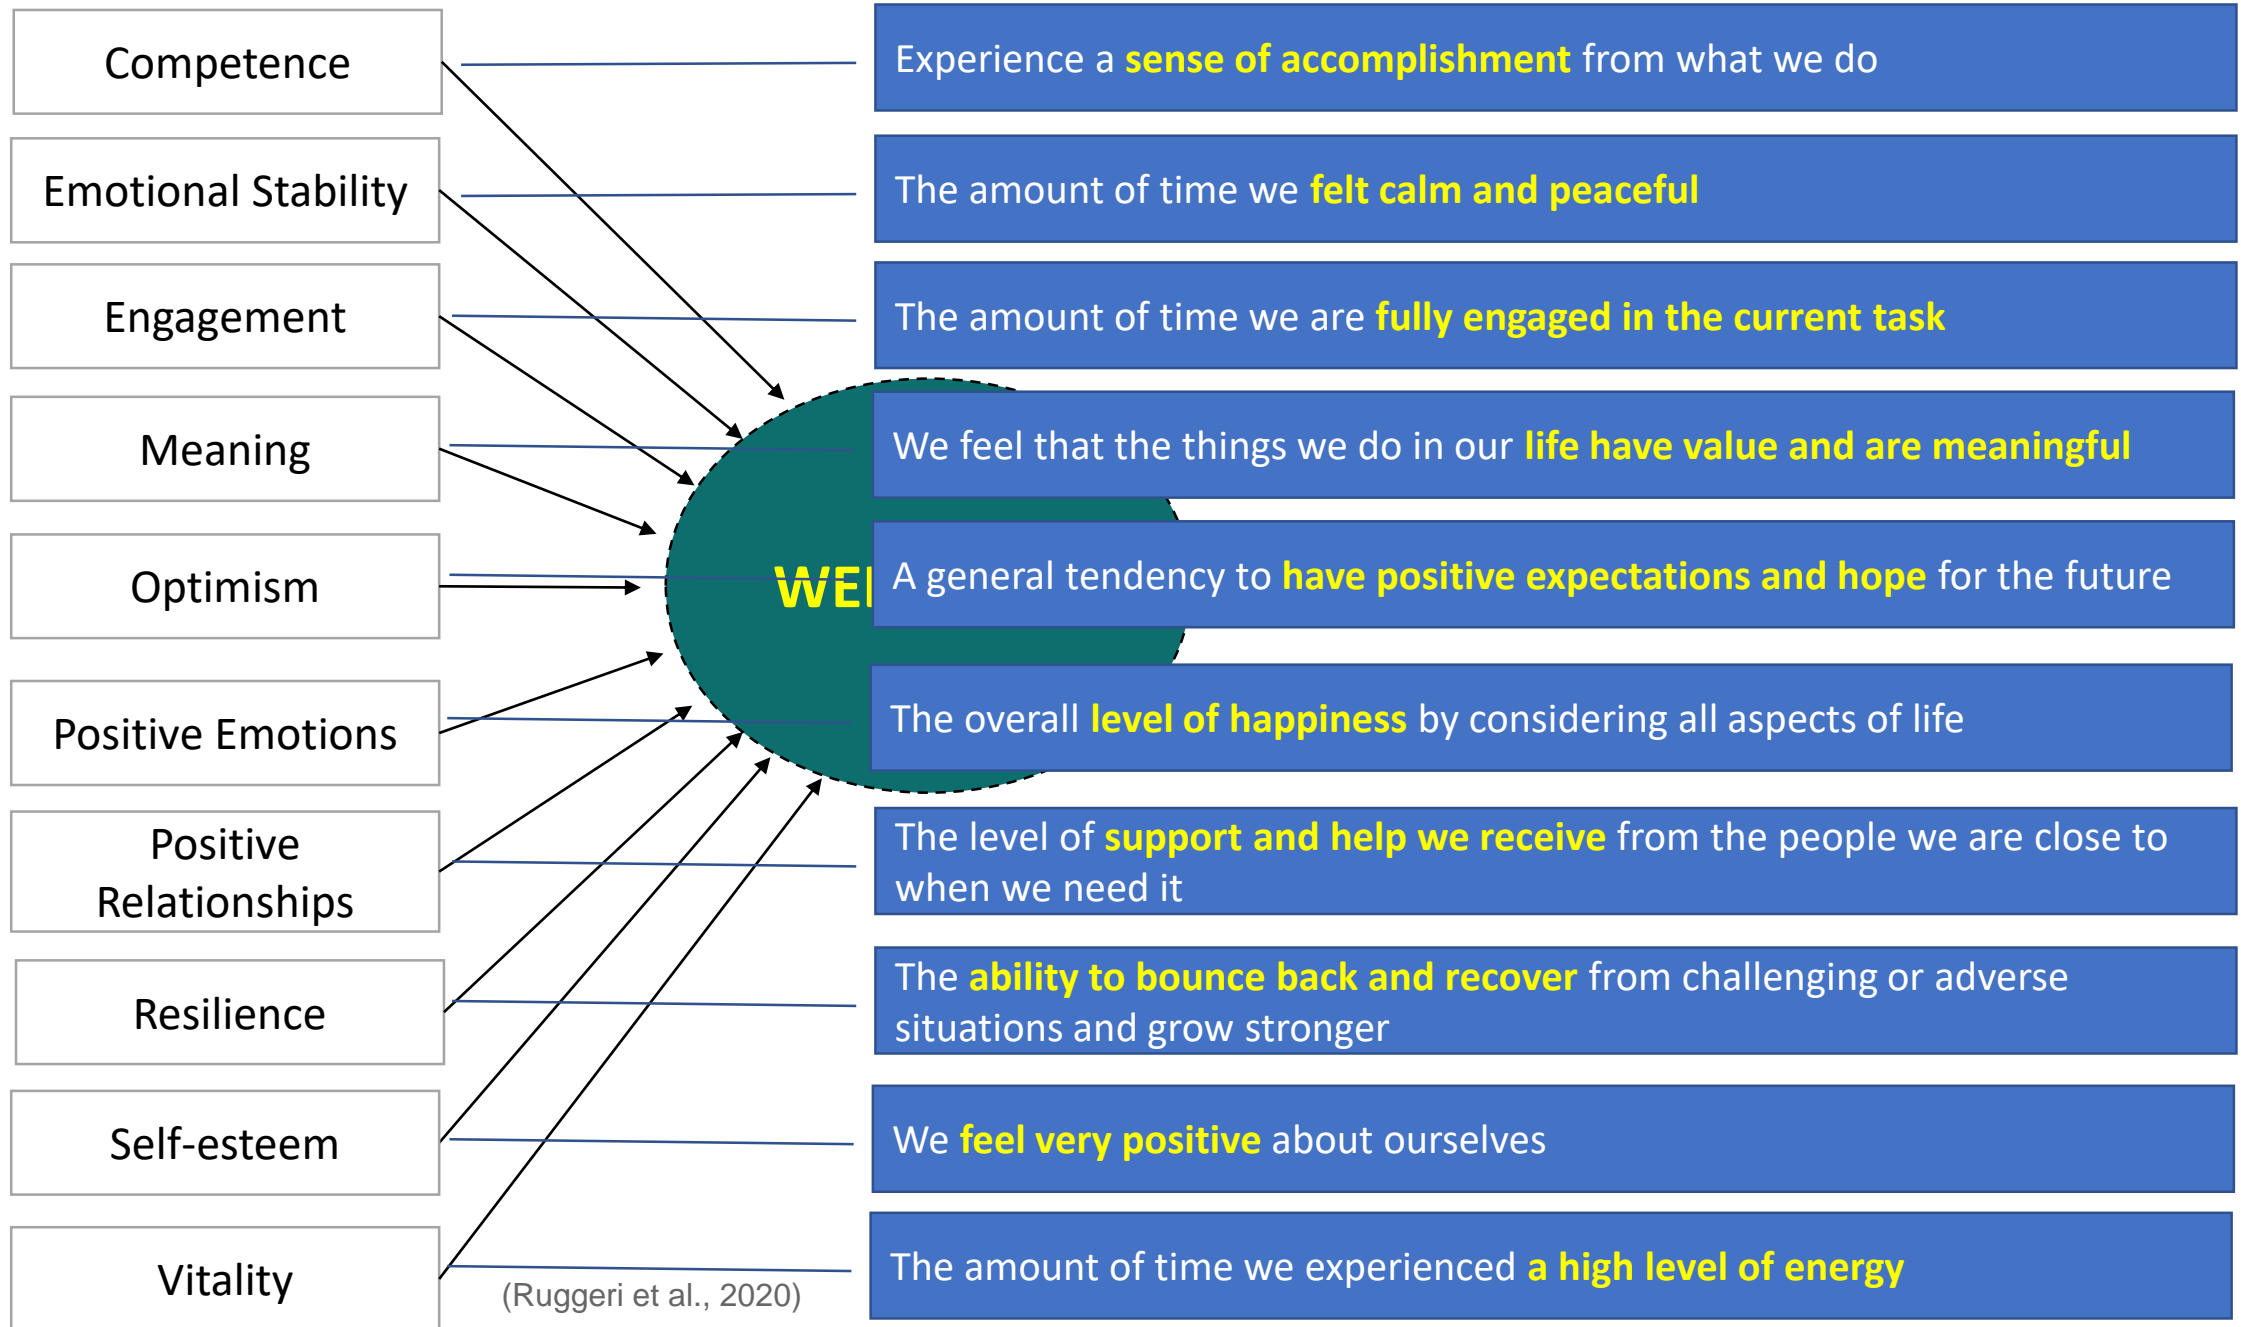

**Well-being** has been defined as the combination of **feeling good and functioning well**; the experience of **positive emotions** such as happiness and contentment as well as the **development of one's potential**, having some **control over one's life**, having a sense of purpose, and **experiencing positive relationships**.

(Huppert, 2009)

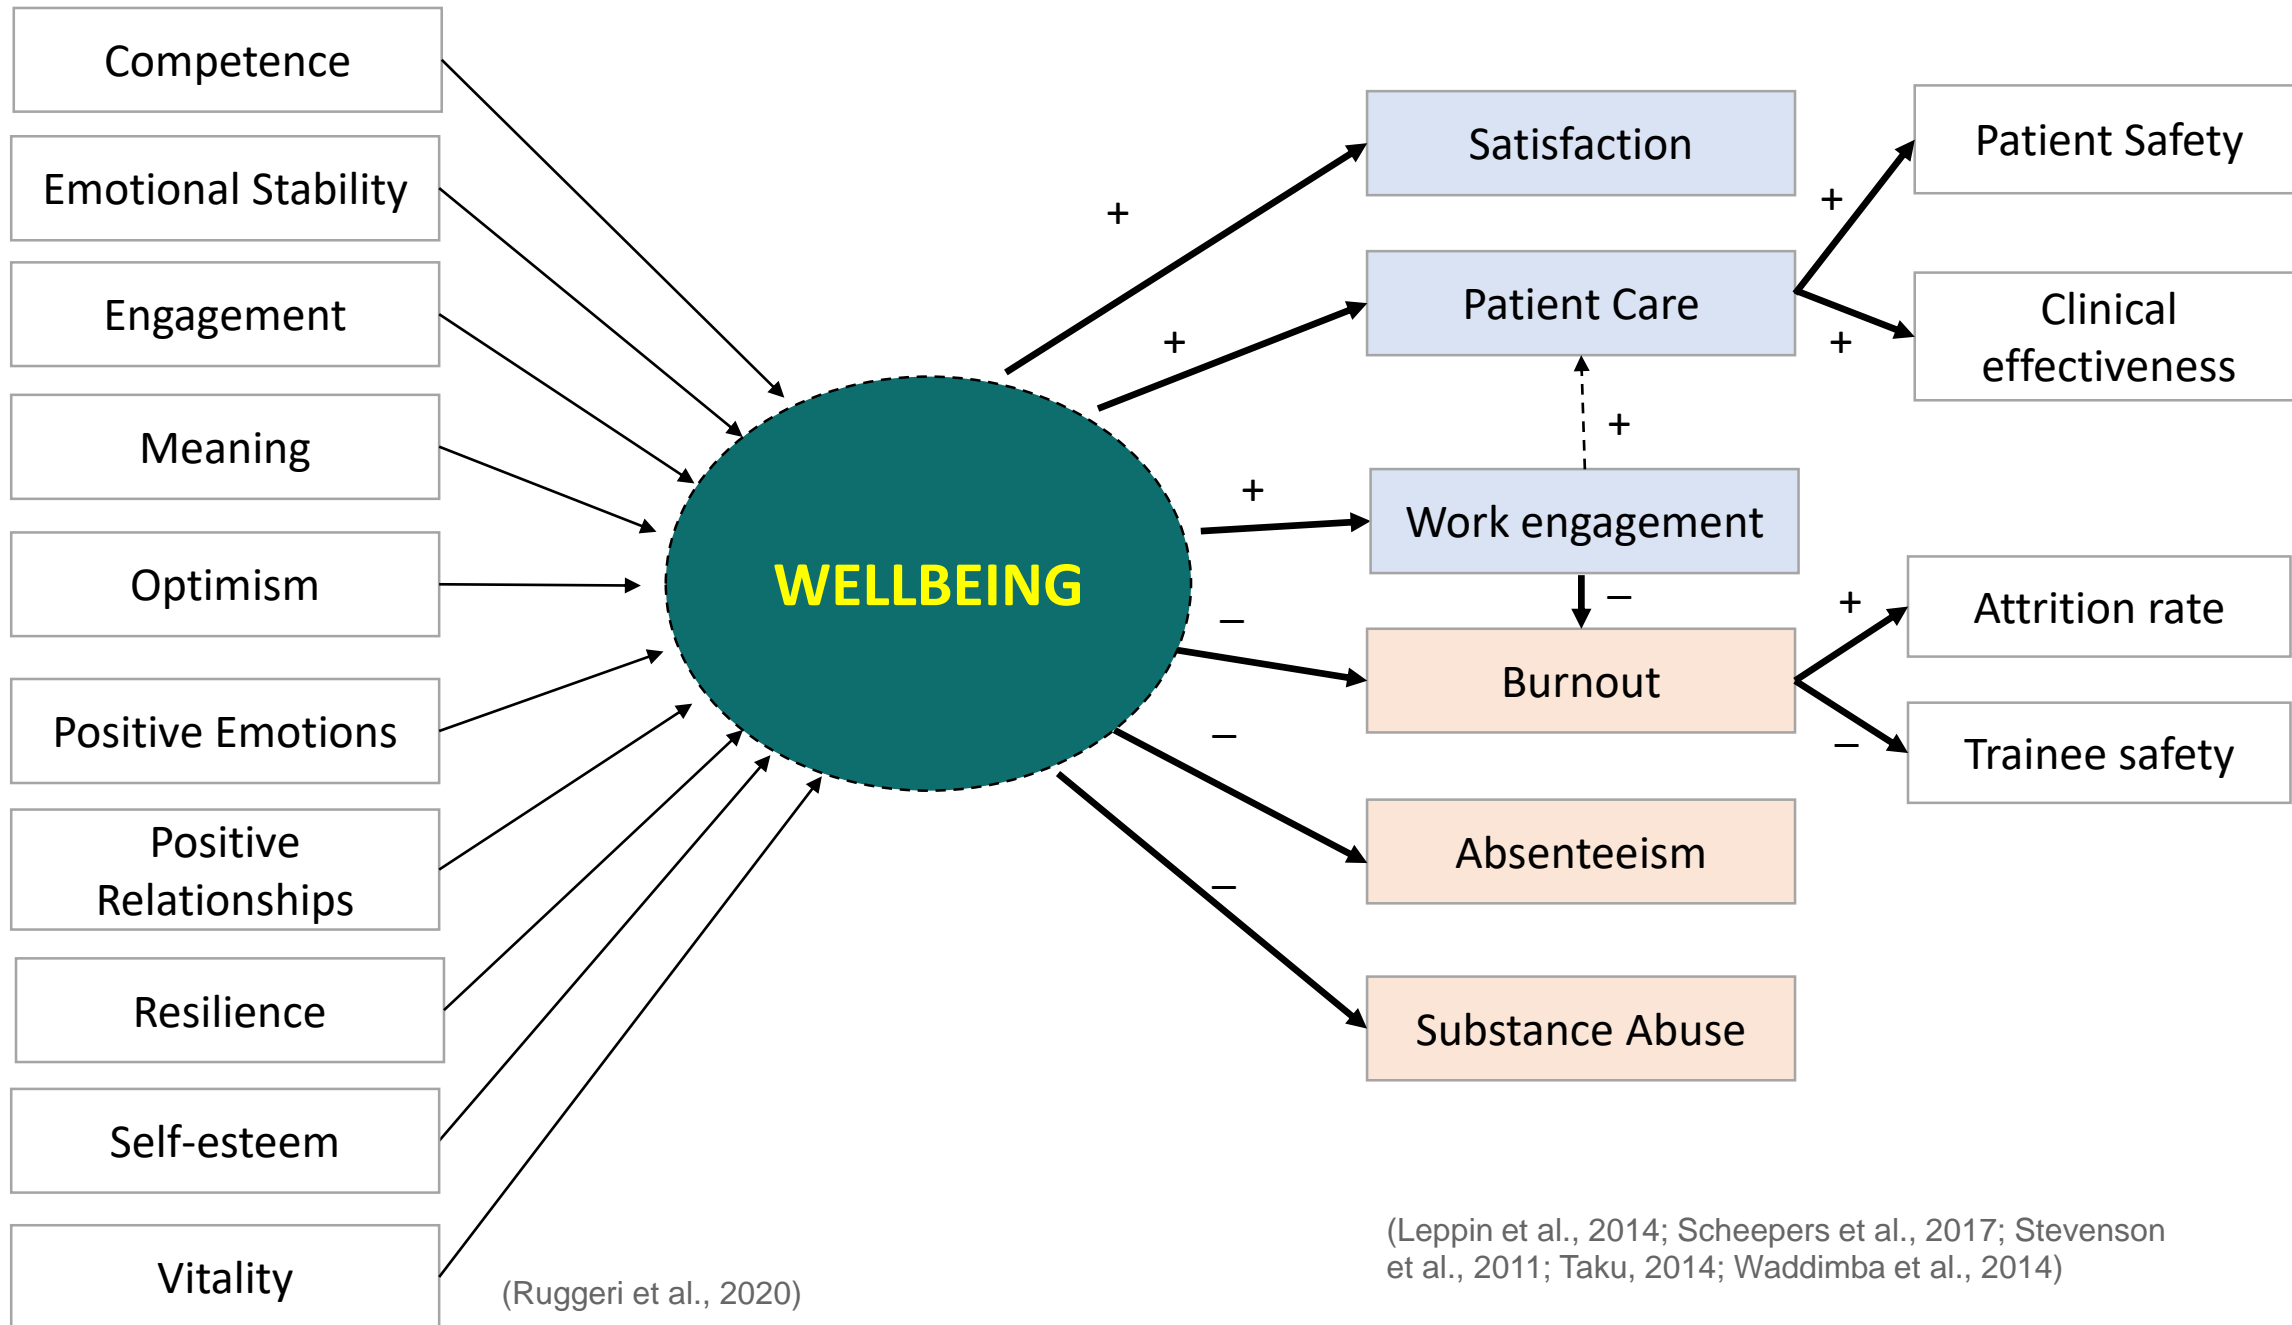

**e-Portfolio** is a **dynamic and personalized digital platform** that serves as a versatile tool for individuals to **curate, showcase, and reflect** on their **learning, competencies, and experiences**.

(Kirby et al., 2023)

# 10 Indicators of Wellbeing

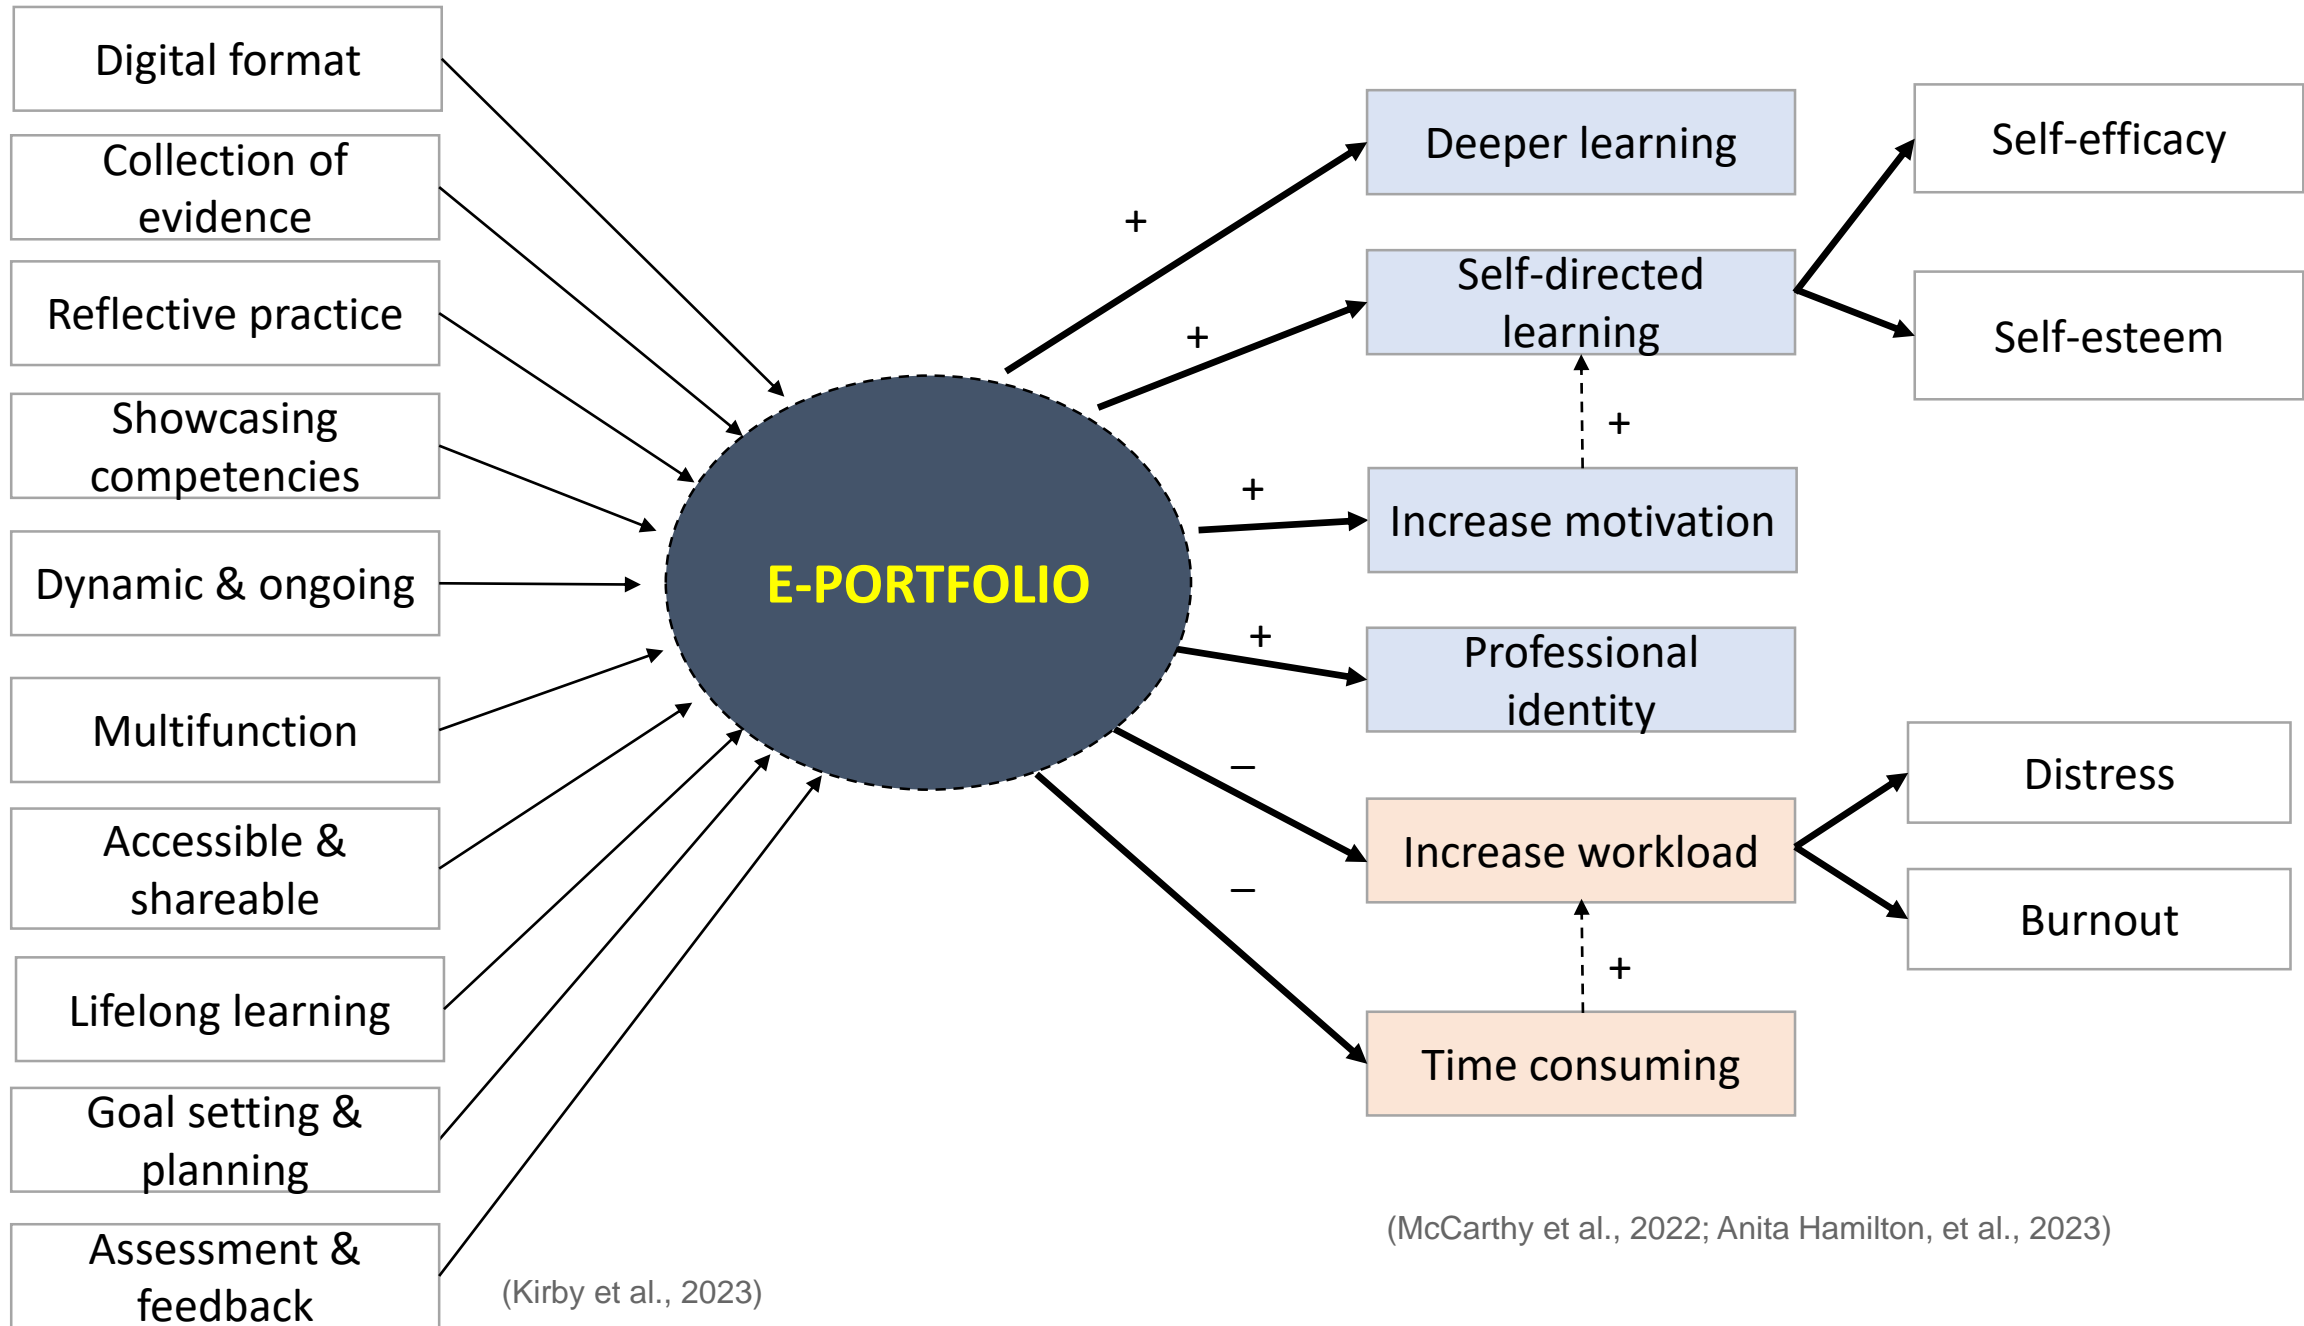

# 10 Indicators of Wellbeing

(Ruggeri et al., 2020)

(Leppin et al., 2014; Scheepers et al., 2017; Stevenson et al., 2011; Taku, 2014; Waddimba et al., 2014)

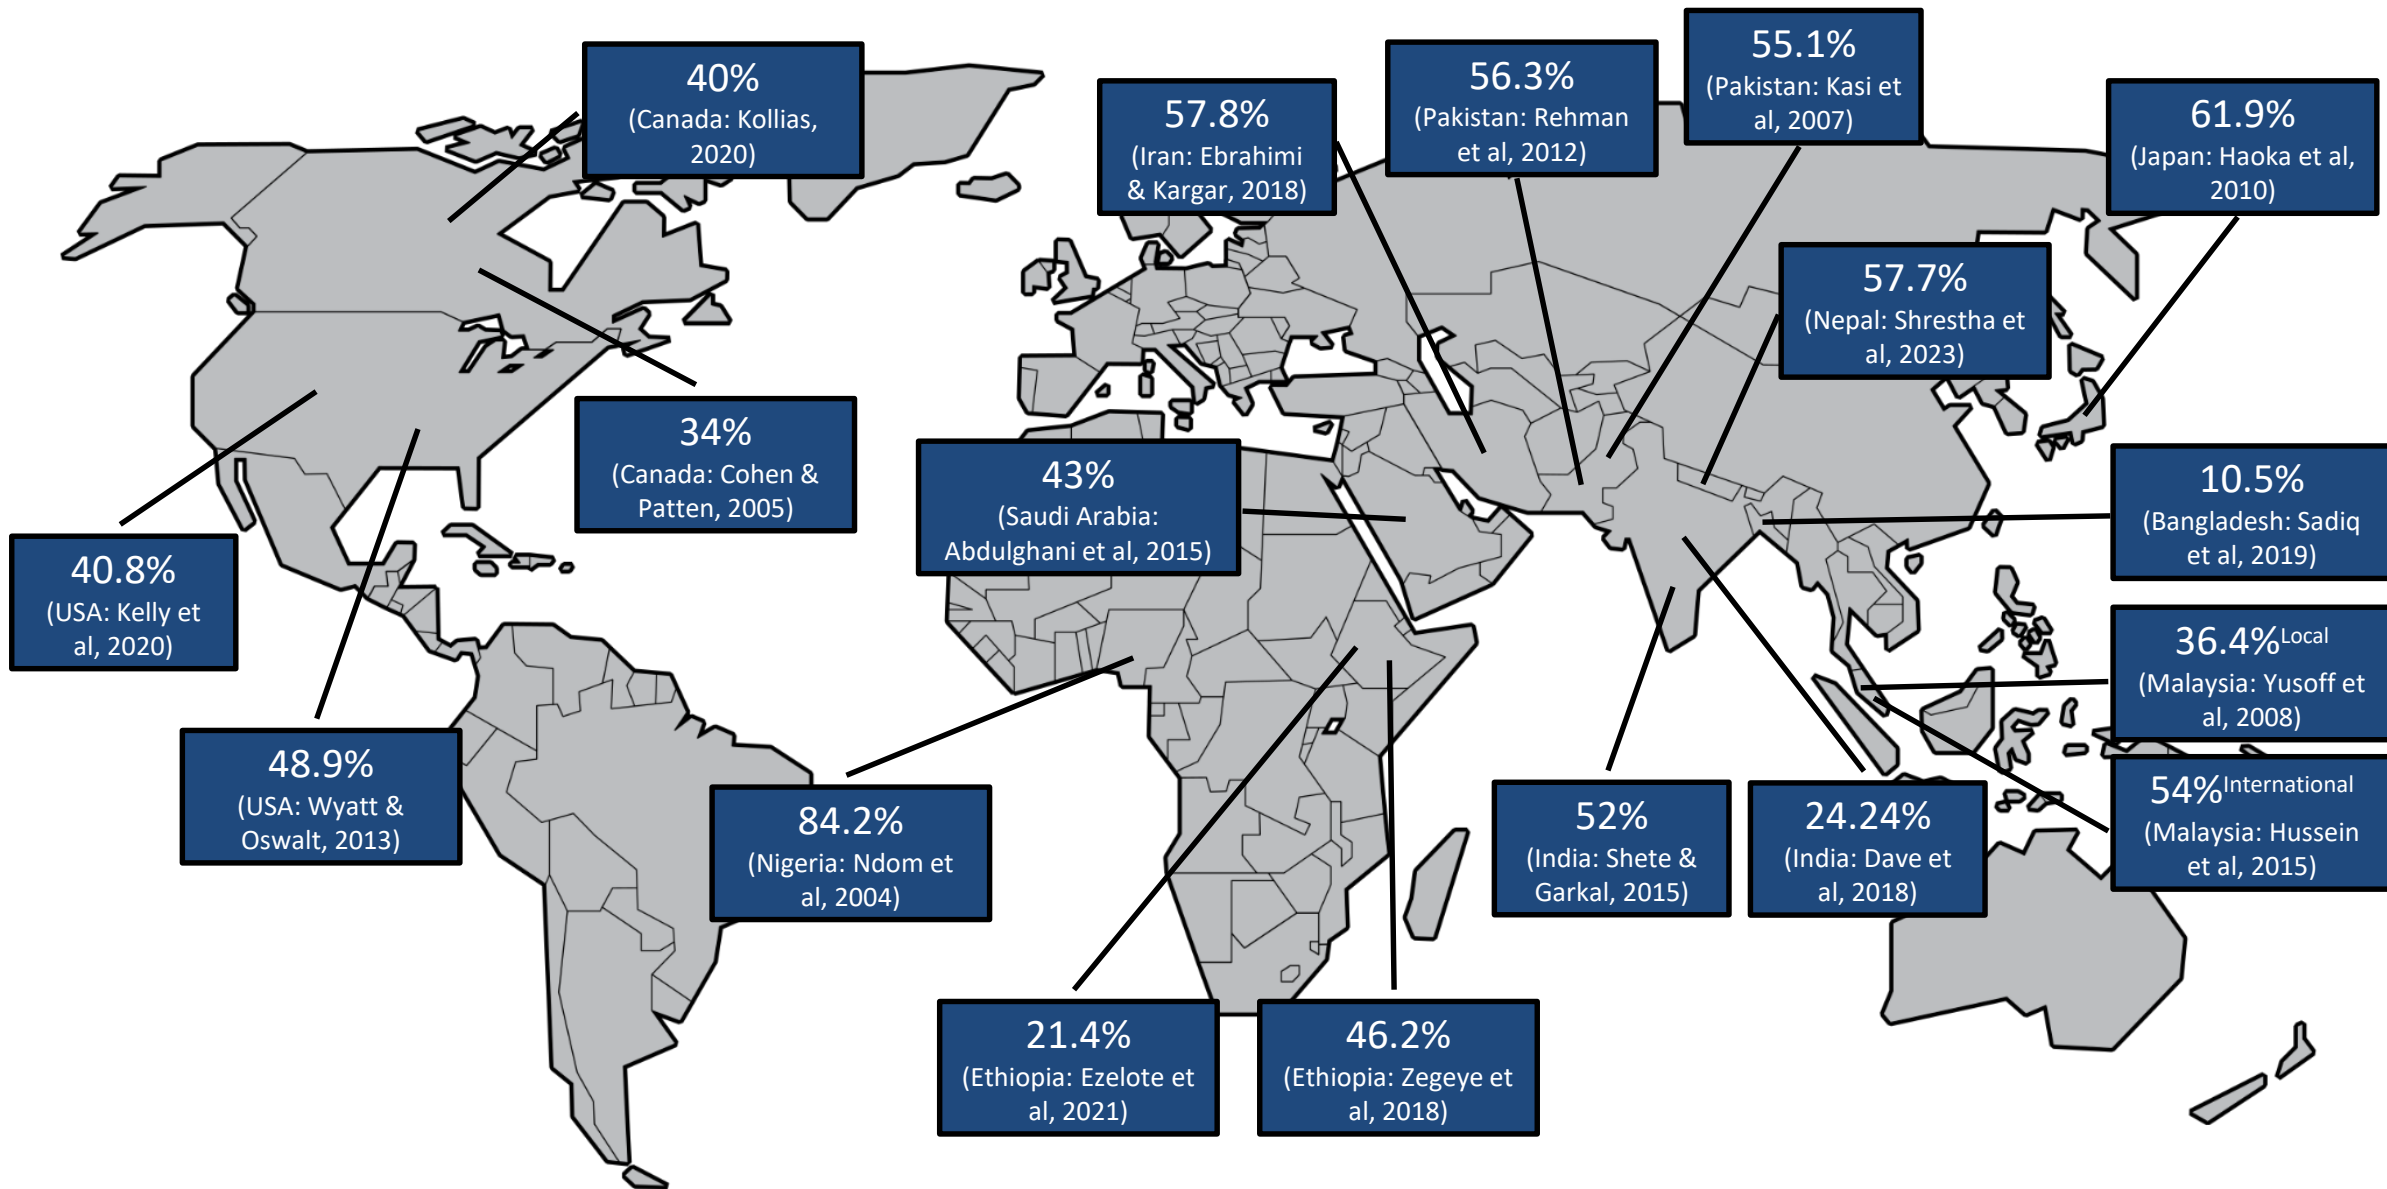

# 10 Features of e-Portfolio

# The wellbeing is not optimal during UG medical training, especially during examination

	Before Medical Training	During Medical Training	During Final Examination
DISTRESS	4.1%	11.8-19.7%	19.9%
ANXIETY	55.6%	41.1-57.3%	56.7%
DEPRESSION	1.8%	12.0-16.8%	30.0%

# The Prevalence of Psychological Distress in PG Learners

# The Prevalence of Burnout in PG Learners

# Burnout mostly relate to the experience of low personal accomplishment

(Henning et al, 2018; Yusoff, 2018, 2019)

### ABSTRACT

**Background:** Mental wellbeing issues among medical students are common, and their relationship to medical professionalism is debated. Few studies have attempted to link such issues with undergraduate medical education. This review aimed to advance the knowledge on this matter by exploring the relationship between mental wellbeing and medical professionalism in undergraduate medical education.

**Methods:** We collected the literature about mental wellbeing and medical professionalism (published from 1 January 1986 to 31 March 2021) from the Web of Science, PubMed, Scopus and ScienceDirect databases using the search terms 'mental wellbeing' and 'medical professionalism'. We included all peer-reviewed articles in which mental wellbeing and medical professionalism in the undergraduate medical education context were the central topics regardless of the age range, nationality, race and gender of the participants.

**Results:** From the 13,076 initially found articles, 16 were included. These 16 articles were from nine countries in four different continents, which all together helped us find answer to our research question using extracted points relating to the main study themes (mental wellbeing and medical professionalism). Under theme 1 (mental wellbeing), six subthemes emerged: burnout, stress, depression, disappointment, depersonalisation and conscientiousness. Theme 2 (medical professionalism), on the other hand, had five subthemes: empathy, academic performance, compassion, unprofessional behaviour and professionalism. A significant inverse association was found between empathy and burnout. Academic performance was also related to burnout. At the same time, empathy was found to have a varied association with stress. Moreover, compassion was found to alleviate burnout and nurture professional gratification.

**Conclusion:** The medical professionalism attributes were found to deteriorate as the mental wellbeing issues grow. This can harm medical students' overall health, current learning abilities and future attitudes towards their patients. Explicit primary research is thus required to examine and intervene in the cause-effect relationship between medical professionalism and mental wellbeing.

### KEYWORDS

Medical professionalism attributes; mental wellbeing; burnout; empathy; stress; relationship; scoping review

“The medical professionalism attributes were found to deteriorate as the mental wellbeing issues grow. This can harm medical students' overall health, current learning abilities and future attitudes towards their patients.”

A small, vibrant green seedling with several leaves is growing out of a crack in a piece of dark, charred wood. The background is a soft-focus, natural setting.

“Healthy citizens  
are the greatest  
asset any country  
can have.”

*Sir Winston Churchill*

**What can we  
offer to promote  
wellbeing  
through e-  
portfolio use?**

“ **Time, Culture, Opportunity** and **Individual Strengths** are **four overriding elements to influence achievement in higher education and life in general.** They are realities that need to be considered in the structure of the higher education environment by leaders as well as academics and students. Some may apply more than others, but all should be considered. ”

(Henning et al, 2018)

# Wellbeing Drivers

## INDIVIDUAL STRENGTHS

The things individuals are good at and the unique qualities that make them who they are.

**e-Portfolio:** Showcasing what individuals are best at and what makes them stand out.

## CULTURE

The diverse backgrounds, beliefs, and ways of doing things that people bring to a group or community.

**e-Portfolio:** Respecting and appreciating the unique perspectives and values each person brings.

T

## TIME

The number of hours individuals have and how they manage them.

**e-Portfolio:** Finding the right moments to work on it without feeling rushed or stressed.

I

## OPPORTUNITY

Having a chance to do something or access resources that can help individuals.

**e-Portfolio:** Getting the chance to showcase individual skills and achievements, with everyone having a fair chance.

O

C

# Relevance to Wellbeing & e-Portfolio

## INDIVIDUAL STRENGTHS

When e-portfolio **reflects individual strengths**, it **boosts confidence** and makes them feel proud. It is a **positive experience** that adds to the **overall wellbeing**.

## CULTURE

When **e-portfolios acknowledge and value everyone's unique background**, it creates a **positive environment**. **Feeling included and respected** boosts our emotional wellbeing.

T

## TIME

**Taking the time we need for e-portfolio** helps us do a better job and **doing it without feeling rushed** keeps stress levels low, **contributing to the overall wellbeing**.

I

## OPPORTUNITY

When **everyone gets a fair opportunity to shine through e-portfolio**, it feels good. Having access to resources and guidance **boosts confidence and wellbeing**.

# Cultivating Wellbeing in Higher Education (HE) Wellbeing Framework

(Marcus A. Henning, Christian U Krageloh, Racher Dryer, Fiona Moir, D. Rex Billington & Andrew G. Hill, 2017)

The **attainment** of competency  
**Feedback** (quality & quantity)  
(Gibbs, 2006; Adam, 2020)

**Appropriateness** of assessment  
(relevance & fairness)  
**Support** students' learning  
(Gibbs, 2006; Adam, 2020)

**What frame student learning attainment?**

Assessment **influence students' learning** and their **study behavior**  
(Ramsden 2003; Gibbs & Simpson 2004; Gibbs 2006; Nicol & Macfarlane-Dick 2006; Harland et al. 2015; Wass et al. 2015)

**What students have gained after done it?**

# Assessment Experience

Assessment should be able to **optimize the capabilities of all learners** by providing motivation and direction for future learning (Epstein, 2007)

Learning **effort**  
**Motivation** for learning  
Cope with **assessment load**  
(Gibbs, 2006; Adam, 2020)

**What students do or happen to them?**

Assessment outcomes **have long-term effects**, powerfully influencing graduate opportunities, employability and **life-long learning** (Boud 2000; Knight & Yorke 2003; Boud & Falchikov 2006)

**Effective assessment** creates synergies between assessment components in order to generate greater learning impact than individual component by fitting purpose, building on connectedness, emphasizing on learning evidence and prevent unnecessary load.

(OECD, 2013)

**#01 Fitting  
Purpose**

**#04 Preventing  
Unnecessary Load**

**#02 Building on  
Connectedness**

**#03 Emphasizing on  
Learning Evidence**

# Assessment & Wellbeing Interrelationships

Students are provided with positive assessment experience to enhance their wellbeing.

We have argued that **teachers must adopt enabling wellbeing strategies** if they are to be retained as effective practitioners and as **role models that contribute to the wellbeing of future generations.**

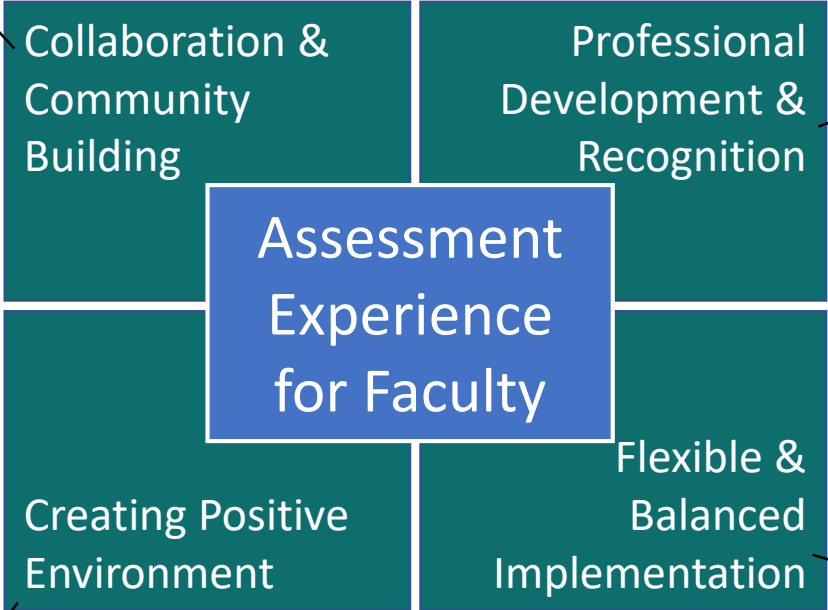

**“Well Teachers,  
Well Students.”**

(McCallum & Price. Well Teachers, Well Students, *Journal of Student Wellbeing*, 2010;4:19-34)

1. Encourage collaboration among faculty members
2. Foster a supportive community for sharing best practices and experiences.

Growth

Assessment Experience for Faculty

Collaboration & Community Building

Professional Development & Recognition

Creating Positive Environment

Flexible & Balanced Implementation

3. Offer faculty training opportunities on effective assessment design & feedback.
4. Acknowledge & reward faculty members for their efforts.
5. Highlight how it contributes to faculty growth & advancement.

Self-Control

6. Flexible assessment criteria to accommodate different disciplines.
7. Set realistic assessment load considering faculty workload.
8. Provide technology support to address technical challenges timely

Management

9. Offer ongoing support for faculty members on using assessment tools.
10. Encourage a positive feedback loop by providing constructive feedback.

Engagement

# Summary

## REAL CONCERN

Wellbeing issues in higher education is a real concern

## UNWANTED IMPACT

Wellbeing issues have unwanted impact on the wellbeing of faculties & learners

## EFFECTIVE e-PORTFOLIO USE

Using e-portfolio effectively to promote wellbeing of learners and faculty members.

## WELLBEING STRATEGIES

Strategies must focus on the indicators that promote wellbeing
