Global health education in UK medical schools: a review of undergraduate university curricula

Natasha Roya Matthews , Bethan Davies, Helen Ward

- Global health education has increased in UK medical schools over the last decade.
- Global health is now a required component of UK medical school curriculum.
- There are gaps in the current provision of global health education.

Virtual global health in graduate medical education: a systematic review

**Lisa Umphrey¹, Nora Lenhard², Suet Kam Lam³, Nathaniel E. Hayward⁴, Shaina Hecht⁵,
Priya Agrawal⁶, Amy Chambliss¹, Jessica Evert⁷, Heather Haq⁸, Stephanie M. Lauden⁹,
George Paasi¹⁰, Mary Schleicher¹¹, Megan S. McHenry⁶**

- Global health education is an important component of graduate medical education.
- The COVID-19 pandemic has highlighted the need for virtual global health education activities.
- 40 articles describing 69 virtual activities were included in the review.
- Common themes identified include wider reach, real-world impact, improved partnerships, and identified gaps in global health practices.
