

Therapeutic Discovery in Pulmonary Diseases

Dr. Aekkacha Moonwiriyaakit,
Ph.D. (Physiology)
Chakri Naruebodindra Medical
Institute, Faculty of Medicine
Ramathibodi Hospital,
Mahidol University
Email:
aekkacha.moo@mahidol.ac.th

Keywords

Pulmonary fibrosis
Airway remodeling
PM2.5
Pulmonary epithelial cells
Free fatty acid receptors
Barrier function
Tight junctions

Focus on

Investigating mechanistic basis
and pathophysiology underlying
COPD, asthma and pulmonary
fibrosis

Identifying intriguing targets and
the potential compounds
that possess anti-inflammatory
and anti-fibrotic roles in
pulmonary epithelial cells
