

Advances in information and communication technology are constantly evolving in today's world. People have easier access to technology for learning. As a result, the education system adapts to keep pace with diverse learning needs. Therefore, online learning has played a role at the higher education level in accordance with globalization and expanding opportunities for students and lead them to develop and achieve life-long learning in the changing world, especially the situation of pandemic of Coronavirus disease (COVID-19).

Ramathibodi School of Nursing, Faculty of Medicine Ramathibodi Hospital, Mahidol University realized the perspective changes of the situation. The program provides the Hybrid Education Model to better fit with student's lifestyle and socioeconomic conditions today.

The Hybrid program in Master of Nursing Science (International Program) was established and launched in 2014. The Hybrid Education Model can be defined as a combination of tradition classroom (face-to-face) and Internet based instruction. The main objective of our hybrid program is to combine the most effective instructional aspects of the traditional classroom with the best features of online classes either synchronous or asynchronous communication. Therefore, "Hybrid Education Model" will be an alternative curriculum for higher nursing education.

Ramathibodi School of Nursing was founded on July 27, 1965 as part of the Faculty of Medicine Ramathibodi Hospital, Mahidol University. Mahidol University is a public university in Bangkok, Thailand, and was ranked Thailand's No. 1 University in 2018 by the Asia-Pacific region 2018.

Ramathibodi School of Nursing designed the curriculum based on the combination of education, research and service aspect of nursing to create a comprehensive and well-rounded learning experience. Courses are taught with an emphasis on clinical nursing practice and nursing research by highly qualified faculties with years of clinical experiences. Especially in the Master of Nursing Science Program (International program), we combine the traditional classroom method of study with internet based instruction which increase chance for the international students to join the program.

Ramathibodi School of Nursing is dedicated to people and health care development through teaching and research. It is also responsible for providing assistance to the regional, national as well as international communities. Ramathibodi School of Nursing is the leader of nursing education, research and academic activity in the Asian region and serves as a light to direct the nation's health.
