RE: Dr Pocharapong Jenjitrant | Fellowship in GU Oncology & Robotic Surgery

To whom it may concern,

Dr Jenjitrant successfully completed a Fellowship in urological surgery using the da Vinci[®] Xi surgical system at Peter MacCallum Cancer Centre, Melbourne, from July 2021 to July 2022.

I certify that during this time, Dr Jenjitrant has performed an adequate number of cases as a patient-side assistant and console surgeon to demonstrate skill proficiency as assessed by the program director.

Dr Jenjitrant has also received training on the following topics regarding da Vinci system use:

- Port placement
- Patient Cart setup, Docking and undocking
- Instrument insertion and exchange
- Surgeon Console settings
- Camera control, Clutching, EndoWrist[®] instrument manipulation
- 3rd arm control, Range of motion
- Retraction, Dissection, Suturing, Applying energy
- Troubleshooting
- Communication

Dr Jenjitrant is now qualified in my opinion to perform minimally invasive procedures using the da Vinci system according to local hospital policies.

Yours sincerely,

Professor Declan Murphy

Consultant Urologist, Director of Genitourinary Oncology & Director of Robotic Surgery
